ICE Juvenile Coordinator's Supplemental Report

Filed Pursuant to the Court's April 3, 2026, Order

I. Introduction

Pursuant to the Court's April 3, 2026, Order, the ICE Juvenile Coordinator respectfully submits this Supplemental Report. The Court directed ICE to provide:

- A census of minors held in ICE facilities or ICE-contracted facilities for more than 20 days during February 2026, March 2026, and, if possible, April 2026;
- A detailed explanation of the reasons for such prolonged detention, including whether detention occurred in a Family Residential Center and/or hotel;
- Information regarding minors held in hotels for more than 72 hours, including whether minors were held consecutively in multiple hotels;
- Where prolonged detention resulted from transportation difficulties or protracted immigration proceedings, whether such minors were determined to present a flight risk or danger to themselves or others;
- Length of Stay calculation for each minor beginning at apprehension, in addition to the Facility Length of Stay ("FLOS") column; and
- A summary of ICE's compliance with Flores Settlement Agreement (FSA) requirements during February, March, and April 2026, including conditions of confinement and efforts undertaken to address concerns identified by Plaintiffs.
- The Order also directed ICE to address conditions of confinement, including, but not limited to:
 - a. provision of age-appropriate food
 - b. adequate temperature control
 - c. availability of additional clothing
 - d. dimmed lighting at nighttime.
- The order also directs ICE to review the conditions described in Plaintiffs' response to the March 2026 supplemental report and describe the efforts undertaken to address those conditions.

II. Executive Summary

ICE reviewed census data, custody histories, hotel-placement records, transportation information, facility compliance and activity reports, grievance data, inspection findings, and operational information for the reporting period. Based on that review, ICE identified 567 case entries involving minors held in Family Residential Centers for more than 20 days during February and March 2026, as well as 86 minors whose hotel-placement sequences exceeded 72 hours during the same period. The updated FRC reports also include a Time in Custody field that provides a total custody-duration metric separate from FLOS.

The principal reasons for prolonged detention and extended placement were not attributable to a single cause. The records reflect that extended stays resulted from required immigration case-processing events, including scheduled administrative or immigration hearings, USCIS fear/asylum screening, Immigration Judge review, voluntary departure processing, appeal activity, travel or removal logistics, transportation disruption, placement coordination, and certain medical or welfare-related considerations.

ICE also reviewed the conditions-of-confinement issues raised by Plaintiffs, including allegations concerning medical care, food, clothing, lighting, education, language access, staff conduct, and legal access. The available oversight and inspection information reflected stable facility operations overall during the reporting period, while also identifying education as the most persistent compliance concern. ICE and facility staff undertook corrective and monitoring measures during the reporting period to address issues identified through inspections, oversight activity, and operational review.

As set forth below, ICE provides the Court with the census and hotel-placement information requested, explains the principal causes of prolonged detention, describes Time in Custody, LOS, and FLOS methodology, summarizes compliance information for the reporting period, and addresses the issues raised in Plaintiffs' recent filings and correspondence.

III. Sources, Scope, and Methodology

A. Sources of Information

This Report is based on information compiled from the following sources:

- ICE case-tracking data;
- custody histories and apprehension information;
- facility records;
- hotel placement records;
- transportation records;
- compliance and activity reports;
- grievance data and logs;
- inspection reports;
- declarations or concerns raised in Plaintiffs' recent submissions; and
- internal operational and monitoring records.

B. Scope of Review

The review period addressed in this Report is February 2026 through April 2026, unless otherwise stated. Where April information was still being compiled at the time of drafting, ICE has identified those limitations.

C. Methodology

For purposes of this Report:

- Time in Custody / Length of Stay (“LOS”) reflects total time in custody beginning at apprehension;
- Facility Length of Stay (“FLOS”) reflects time spent at the relevant facility and is distinct from total time in custody;
- Hotel placements were reviewed separately and, where applicable, consecutive hotel stays were evaluated in the aggregate; and
- Minors were identified for inclusion through ICE custody and placement records.

The FRC 20+ day review was summarized in Exhibit A, and the hotel-placement review was summarized in Exhibit B. For FRC placements, ICE reviewed Time in Custody, FLOS, the narrative reason for length of stay, and disposition or status where reflected in the records. For hotel placements, ICE reviewed the hotel-placement sequence, related transportation or staging events, duration, reason for placement, actions taken, and disposition or status where reflected in the records.

Where allegations raised by Plaintiffs could not be matched to a specific individual, incident, or record due to the absence of sufficient identifiers, ICE notes that limitation in the response section below.

IV. Census of Minors Held More Than 20 Days

A. Summary Findings

ICE reviewed the updated February and March 2026 FRC 20+ Day Reports and identified 567 case entries involving minors held in Family Residential Centers during the reporting period.

Each entry includes a narrative explanation in the “Reason for Length of Stay” column. The updated reports also include a “Time in Custody” field, which provides a custody-duration metric separate from facility length of stay. The principal reasons for extended lengths of stay were not attributable to a single cause. Rather, the records reflect that prolonged stays resulted from required immigration case-processing events, including scheduled administrative or immigration hearings, USCIS fear/asylum screening, Immigration Judge review, appeal activity, voluntary departure processing, removal coordination, travel-document issues, and transportation or removal logistics.

The primary driver reflected in each narrative entry was categorized as follows:

Census of Minors Held More Than 20 Days

Reason Categories			
Reason Category	Case Count	Share of Cases	Summary
Pending scheduled administrative / immigration hearing	203	35.8%	Detention continued while cases awaited scheduled administrative hearings, individual hearings, Immigration Judge action, or other proceedings-related events.
Voluntary departure / travel scheduling logistics	137	24.2%	Cases involved voluntary departure processing, commercial or charter flight scheduling, repatriation coordination, travel-document issues, or other transportation logistics.
USCIS fear/asylum screening and IJ review process	135	23.8%	Cases involved USCIS positive or negative findings, Notices to Appear, Immigration Judge review of USCIS findings, or fear/asylum-related processing.
Removal order / appeal / post-order processing	79	13.9%	Cases involved removal orders, final orders, BIA or other appeal activity, stays of removal, motions to reopen, habeas-related issues, or continued custody pending post-order processing.
Other individualized processing considerations	13	2.3%	Entries reflected individualized circumstances not cleanly captured by the categories above.
Total	567	100.0%	

Census of Minors Held More Than 20 Days

B. Time in Custody Pattern

Across the February and March reports, the records contain 567 total case entries. Based on the updated Time in Custody data, and where necessary calculating total custody time from FLOS plus the period between apprehension and book-in, the average Time in Custody was approximately 57 days, and the median Time in Custody was approximately 44 days.

Most entries clustered between 20 and 60 days, with a smaller but meaningful group exceeding 90 days.

Time in Custody Pattern

Total Cases: 567

C. FLOS Pattern

The reports also include FLOS with Book-out, which reflects the time spent at the relevant FRC facility. FLOS is distinct from total Time in Custody because a minor may have been apprehended before book-in at the FRC.

Based on the FLOS data, the average FLOS was approximately 53 days, and the median FLOS was approximately 41 days.

FLOS Pattern

Total Cases: 567

D. Summary

The February and March 2026 FRC 20+ Days Reports demonstrate a substantial decrease in the number of Flores class members held 20 days or longer in DHS custody. The February 2026 report identified 426 such minors, while the March 2026 report identified 141, reflecting approximately a **67 percent reduction** in the 20+ day Flores cohort at the DIPC between these two months. These figures are derived from IIDS-based FRC 20+ Days reports and reflect all records meeting the 20+ day reporting criteria for each month; some individuals may appear in both months if they remained in custody across the reporting periods (see Exhibit A).

The February and March 2026 FRC 20+ Days Reports further reflect that extended lengths of stay were primarily attributable to required immigration case-processing events rather than unexplained delay. The most common primary driver was continued detention pending scheduled administrative or immigration hearings, followed by voluntary departure processing and travel logistics, USCIS fear/asylum screening or Immigration Judge review, and removal-order or appeal-related activity.

The Time in Custody data provides a measure of the total period a minor was in DHS custody, while the Facility Length of Stay (FLOS) reflects the portion of that period spent at an FRC. Considered together, these metrics show that most cases remained clustered between 20 and 60 days, with a smaller subset involving longer custody periods due to continued proceedings, appeal activity, post-order processing, travel-document coordination, or removal logistics.

A census table containing the individualized information requested by the Court is attached as Exhibit A. For each minor or family unit held more than 20 days, the table identifies the Time in Custody, FLOS, primary reason for continued custody, actions taken by ICE, and the disposition or status. The categories summarized above reflect the principal reason identified in the narrative entry; in some cases, more than one factor contributed to the overall length of custody (for example, a scheduled hearing followed by voluntary departure processing and associated travel arrangements).

V. Hotel Placements Exceeding 72 Hours

A. Summary Findings

ICE reviewed the February and March 2026 hotel-stay records and identified 86 minors whose hotel-placement sequences exceeded 72 hours during the reporting period.

Of those:

- 38 minors were identified in February 2026;
- 48 minors were identified in March 2026; and
- 86 minors had placement sequences involving hotel placement and related consecutive custody or transportation placements.

ICE reviewed the reason for each placement, the duration of the stay, the related custody or transportation sequence, and the recorded disposition. The relevant information is summarized in Exhibit B.

The principal reasons for hotel placements exceeding 72 hours were transportation scheduling, pre-removal staging, flight delays or cancellations, travel-document or consular coordination, family-unit, or reunification coordination, and medical or facility-availability considerations.

B. Primary Drivers of Hotel Placements Exceeding 72 Hours

Hotel Placement Reasons

Reason Categories			
Reason Category	Case Count	Share of Cases	Summary
Transportation scheduling / pre-removal staging	38	44.2%	Minors were staged in hotel placements while ICE coordinated removal, voluntary departure, or onward travel.
Transportation disruption / flight rescheduling	23	26.7%	Hotel stays were extended because of cancelled flights, returned flights, missed landing windows, mechanical issues, manifest discrepancies, or other travel disruptions.
Travel-document / consular / POE coordination	12	14.0%	Stays were prolonged while ICE coordinated passports, consular arrangements, Mexican immigration appointments, port-of-entry processing, or related travel-document issues.
Family-unit / reunification coordination	5	5.8%	Stays were extended because of family-unit coordination, reunification issues, USC child-related coordination, or related family travel issues.
Medical, quarantine, or facility-availability considerations	5	5.8%	Stays were prolonged because of quarantine, facility availability, or other medical or welfare-related placement considerations.
Other individualized travel or placement coordination	3	3.5%	Entries reflected individualized circumstances, not cleanly fitting the categories above.
Total	86	100.0%	

Hotel Placement Reasons

C. Duration Pattern

Across the February and March hotel-stay records, the placement sequences exceeding 72 hours ranged from 72.1 hours to 425.7 hours, or 3.0 days to 17.7 days.

The median duration was approximately 96 hours, or 4.0 days. The average duration was approximately 134 hours, or 5.6 days.

🕒 Duration Pattern

Range: 72.1–425.7 hours (3.0–17.7 days) | Median: 96 hours (4.0 days) | Average: 134 hours (5.6 days)

72–96 hours 43	97–120 hours 20	121–168 hours 13	169+ hours 10
-------------------	--------------------	---------------------	------------------

D. Disposition Summary

📋 Disposition Summary

Total Cases: 86

Removed 52 60.5%	Voluntary departure 29 33.7%	Order of recognizance 3 3.5%	Voluntary return 2 2.3%
------------------------	------------------------------------	------------------------------------	-------------------------------

The records reflect the following dispositions for the 86 minors:

E. Consecutive Hotel Placements

ICE identified 86 minors whose hotel-placement sequences involved consecutive placement activity associated with hotel use, transportation staging, hold rooms, transit locations, or other related custody locations.

Within that group, 44 minors had more than one hotel-stay segment reflected in the records. These placements are summarized in Exhibit B and described, where appropriate, in the accompanying narratives.

F. Summary

The February and March 2026 hotel-stay records reflect that hotel placements exceeding 72 hours were primarily attributable to travel and removal logistics rather than a single cause. The most common reason was pre-removal or pre-departure staging while ICE coordinated transportation, removal, voluntary departure, or onward travel.

Other recurring reasons included cancelled or returned flights, missed landing windows, mechanical issues, manifest discrepancies, consular or port-of-entry coordination, family-unit, or reunification issues, and medical or facility-availability considerations, including quarantine-related circumstances. Based on the records, hotel stays continued while ICE coordinated the next required step necessary to effectuate removal, voluntary departure, voluntary return, release, or related onward travel.

A hotel-stay table containing the individualized information requested by the Court is attached as Exhibit B. The table identifies, for each minor, the relevant placement chronology, duration, reason for the extended hotel placement, actions taken by ICE, and disposition or status.

G. Current Practice Regarding Hotel Use

ICE recognizes the Court's April 3, 2026 order, which stated that "Defendants shall cease placing minors at hotels, with a narrow exception for brief, one to two-night stays while in transit or prior to flights." Dkt. # 1755.¹ ICE reviewed the hotel placements identified during this reporting period and has identified that most delays were caused by unforeseen circumstances such as mechanical breakdown, flight reschedule, same day travel request, and parental interest accommodation.

VI. Transportation Delays, Proceedings-Related Delays, and Required Risk Findings

See the reasons for delays reflected in Column N of the Hotel Stays Report (Exhibit B), including the day-by-day reason entries for minors whose hotel-placement sequences exceeded 72 hours, on the following page.

¹ The government recently moved for reconsideration of the Court's April 3, 2026 order regarding hotel use because the Court's prior orders about hotels related to Title 42. Dkt. # 1760.

🕒 Transportation Delays, Proceedings-Related Delays, and Required Risk Findings

See the reasons for delays reflected in Column N of the Hotel Stays Report (Exhibit B), including the day-by-day reason entries for minors whose hotel-placement sequences exceeded 72 hours, on the following page.

Reason for Delay Reflected in Column J		
Reason for Delay Reflected in Column J	Case Count	Summary
Pre-removal staging / transportation scheduling	39	Minors or family units were staged in hotel placements while ICE coordinated removal, voluntary departure, commercial air travel, charter travel, or transportation scheduling from the relevant field office or departure location.
Flight disruption / rescheduling	17	Delays resulted from cancelled flights, returned flights, missed landing windows, mechanical issues, manifest discrepancies, flightline cancellations, or departure flights being delayed and rescheduled.
Family-unit / reunification / consular-document coordination	13	Delays involved family-unit coordination, reunification issues, USC child-related coordination, ORR sibling reunification, mixed-nationality family travel, consular coordination, or assistance obtaining a U.S. passport for a child.
Port-of-entry / Mexican immigration coordination	9	Delays resulted from the need to make or wait for appointments with Mexican immigration officials at the port of entry.
Facility-availability / quarantine-related placement	4	Hotel placement was used or extended because DIPC was on quarantine due to measles or otherwise unavailable for the relevant placement sequence.
Other individualized travel or removal coordination	4	Entries reflected individualized circumstances, including return for release, visa-waiver self-surrender travel, or other case-specific travel/removal coordination.
Total	86	

Transportation Delays, Proceedings-Related Delays, and Required Risk Findings

The hotel-placement records identify 86 Column J delay-reason entries for minors whose hotel-placement sequences exceeded 72 hours. Those entries reflect that extended hotel placements were primarily attributable to transportation and removal logistics, including pre-removal staging, flight scheduling, flight disruption, port-of-entry coordination, family-unit or reunification coordination, consular or travel-document issues, quarantine-related facility availability, and other individualized travel or removal coordination.

The most common reason reflected in Column N was pre-removal staging or transportation scheduling, which accounted for 39 of the 86 entries. Other recurring reasons included flight disruption or rescheduling for 17 entries, family-unit, reunification, or consular-document coordination for 13 entries, port-of-entry or Mexican immigration coordination for 9 entries, facility-availability or quarantine-related placement for 4 entries, and other individualized travel or removal coordination for 4 entries.

For reporting purposes, each Column N entry was assigned to the most specific primary reason reflected in the narrative. Some entries included more than one contributing circumstance, such as a travel-document issue followed by flight rescheduling, or a family-unit coordination issue connected to consular or port-of-entry processing.

VII. Time in Custody, Length of Stay, and FLOS Methodology

A. Time in Custody / Length of Stay

For purposes of this Report, Time in Custody / Length of Stay reflects the total custody period beginning at apprehension and continuing through the relevant custody period identified in ICE's records. In the updated FRC reports, the Time in Custody field provides this total custody-duration metric. Where necessary, total custody time was calculated from FLOS plus the period between apprehension and book.

B. Facility Length of Stay

Facility Length of Stay, or FLOS, reflects the amount of time the minor spent at the relevant facility or placement location, as distinct from total time in custody.

C. Hotel-Placement Duration

For purposes of the hotel-placement review, ICE reviewed the placement sequence reflected in the hotel-stay records, including book-in and book-out information associated with hotel placements, transportation staging, hold rooms, transit locations, and related consecutive placement events where reflected in the records.

D. Presentation of Metrics

To provide the Court with a complete picture of time in custody and time at the relevant placement location, this Report, and the attached exhibits present, where available, Time in Custody, LOS, and FLOS for each applicable minor, along with the placement chronology, reason for the extended stay, actions taken by ICE, and disposition or status.

VIII. Compliance Overview During the Reporting Period

A. ICE Weekly Compliance and Activity Information (Compliance Standards Officer Reports)

Overall, the weekly reports indicate that DIPC maintained stable operations from February 2, 2026, through April 17, 2026, while population levels continued to decrease, with ongoing

external oversight and recurring reviews to ensure the education program is properly scaled and meets established standards.

Population and Operations

Across the ten weekly compliance and activity reports covering February 2, 2026, through April 17, 2026, DIPC maintained stable operations as its population continued to decline. Over that time, the reported population decreased from under 997 to under 369 by the final report. Weekly narratives further indicated that the reduced population reflected ICE's work to address Plaintiffs' concerns about expeditious processing. Staff have continued to receive training to support these operational goals.

Oversight and External Activity

External oversight and visitor activity remained consistent, although the level of activity varied from week to week. Across the ten reports, DIPC recorded two DHS site visits, eleven official tours or visitor events, and one week involving reported media interest or activity. Visitors included representatives, outside officials, Flores-related personnel, medical reviewers, ODO personnel, and other visiting officials. Oversight activity was highest during the week ending March 20, 2026, when five official tours or visits were reported.

Resident-Issue Indicators

During the reporting period from February 2, 2026, to April 17, 2026, resident-issue indicators at the DIPC remained low. The number of resident grievances decreased from 26 in February to 11 as of April 17, 2026. In total, 55 grievances were filed during the reporting period; two were substantiated in favor of the residents, while the remaining 53 were determined to be unfounded.

Medical and Housing Activity

Medical and housing indicators fluctuated from week to week but did not reflect sustained systemic disruption. Across the ten reports, weekly totals reflected twenty-nine medically housed residents on site, eleven hospital patients, and twenty-six residents referred to the emergency room. Early in the period, medical personnel also implemented precautionary measures relating to potential measles exposure, vaccine administration, and vaccine handling. Although hospitalizations and emergency room referrals varied, the reports did not identify a sustained medical emergency or broader disruption to medical operations.

Education Compliance

Education was identified as an area receiving ongoing review in multiple reports, with Education Policy noted as pending and oversight activity highlighting areas for further development. The reports referenced implementation, staffing, and expansion needs within the new education

program, including the continued rollout and growth of school services. Related training and familiarity issues were also noted in certain functional areas.

Staffing, Training, and Operational Familiarity

Additional recurring issues involved staff training and operational familiarity in selected areas. Early reports noted ongoing efforts to complete training and address corrective actions related to key and lock control, Talton system familiarity, and staffing shortages in some departments. One February report observed that many staff were personnel stationed at the FRC as temporary duty assignment who were still becoming familiar with facility systems and FRC operations. Another report noted delays in processing associated with staffing shortages. Overall, these areas have remained under review, with continued oversight and retraining efforts to support operational effectiveness.

Overall Assessment

The weekly reports further reflect that DIPC continued to support substantial external oversight without systemic disruption to operations. Weekly narratives referred to inspections and visits by Special Agents, Border Czar Tom Homan, Dr. Paul Wise, Dr. Scott, Plaintiffs' counsel, The Office of Detention Oversight (ODO) personnel, and foreign officials, among others. Despite this level of outside activity, the reports consistently described the facility as continuing daily services, maintaining operational continuity, and adjusting staffing and resources as conditions evolved.

Summary

The weekly reports reflect that DIPC operated in a stable manner from February 2, 2026, through April 17, 2026, with minimal formally reported grievance and incident activity, fluctuating but manageable medical activity, and ongoing external inspections and official visits. The most significant area receiving ongoing review was Education, as the new program continues to be scaled up and evaluated to ensure it meets established standards. Continued attention was also given to staff training, system familiarity, and aligning staffing and resources with operational needs.

B. ICE's Independent Inspection Contractor

Overview of Compliance Efforts

The February, March, and April 2026 compliance reports reflect three consecutive scheduled inspections of the Dilley Immigration Processing Center (DIPC) conducted under the 2020 Family Residential Standards (FRS) and applicable provisions of the FSA. Taken together, these reports show clear progression from partial compliance in February, to corrective action in March, to an overall compliant rating in April.

February 2026 Inspection

During the February 17–19, 2026 inspection, DIPC received a rating of partially compliant. Of the standards reviewed, 37 were rated compliant, one was not inspected, and three were not applicable. Two standards were rated non-compliant: FRS 2.8, *Staff-Resident Communication*, based on ICE supervisors not consistently conducting required housing-unit visits, and FRS 7.5, *Post Orders*, based on CoreCivic supervisors not initialing post orders to document required supervisory review. Both findings were identified as repeat deficiencies from earlier inspections.

March 2026 Inspection

During the March 17–19, 2026 inspection, DIPC improved to a rating of Compliant with Issues. The previously cited deficiencies under FRS 2.8 and FRS 7.5 were corrected and rated compliant. The March inspection identified one remaining non-compliant standard, FRS 2.10, *Use of Physical Control Measures and Restraints*, after review of a February 10, 2026, use-of-force incident showed that audiovisual recording equipment retrieved from the Emergency Response Team locker did not function properly. The March report also noted that FRS 5.2, *Education Policy*, remained under special assessment review rather than receiving a final rating.

April 2026 Inspection

During the April 14–16, 2026 inspection, DIPC received a rating of Compliant. Thirty-nine standards were rated compliant, one standard was rated Compliant with Issues, and three remained not applicable. No standards were rated non-compliant. The report states that the prior FRS 2.10 issue was resolved after the Site Security Manager's special assistant tested the audiovisual equipment and verified that it was functioning properly. The only remaining issue identified in April was FRS 5.2, *Education Policy*, which was rated Compliant with Issues because the facility had not yet formally established the required Special Education Team composed of multidisciplinary staff.

Overall Independent Inspection Contractor Compliance Trend

Across the three inspections, the DIPC demonstrated measurable corrective action over time. The February inspection identified repeat supervisory deficiencies, resulting in a Partially Compliant rating. By March, those repeat findings had been corrected, though one remaining operational issue was noted involving audiovisual equipment. The April inspection documented resolution of that issue and an overall Compliant rating, with Education remaining the only area rated Compliant with Issues. As of the April 2026 inspection, the DIPC was operating in substantial compliance with the FRS, including a full review conducted by the medical SME. (See Exhibits 1, 2, and 3)

Findings - February

DIPC Report of
Findings March 2026

DIPC Report of
Findings April 2026

IX. Flores Allegations and ICE Responses by Category

Submitted April 9, 2026, by Plaintiff's Counsel

1. Allegations about Prolonged Detention of Children and Families

Uncertainty / Prolonged Detention

Resident Allegations

Families report long and uncertain detention periods, often 70 to 125 days or more, with inconsistent information from staff and fear of losing homes, jobs, and schooling. Plaintiffs also reported that 8 children had been detained more than 100 days, 20 children more than 50 days, and one family more than 280 days.

ICE Responses / Position

Each case involving a minor is individually reviewed to determine the appropriate timing for release in accordance with applicable laws and the Flores Settlement Agreement. While residents are free to request review of their cases, ICE works to assess cases and discharge minors from custody as promptly as possible, with a focus on ensuring their safety, well-being, and legal rights.

The assessment process includes:

- **Flight Risk Assessment:** Evaluating recent entry, family or community ties in the U.S., compliance history, and immigration status.
- **Likelihood of Removal in the Foreseeable Future:** Reviewing the status of fear claim adjudication, final order of removal, progress on travel documents, and compliance with removal procedures.
- **Compliance with Laws and Court Orders:** Ensuring all relevant immigration laws, regulations, and court orders are followed.

Family Separation

Resident Allegations

Declarations describe adult-child separations, including medical or operationally driven transfers, and nightly separation of fathers from mothers and children, which residents say causes distress.

ICE Responses / Position

Housing assignments are made with consideration of family composition, classification requirements, and the ages of children, and that family unity is preserved except where separation is required for safety or medical reasons.

During the town halls, ICE will share additional information regarding the operational and safety considerations behind family housing practices. These sessions will highlight daily opportunities for family time, explore the possibility of extended evening access where feasible, and provide clear communication about how and when families can spend time together.

2. Allegations that Class Members Lack Access to Legal Information and Counsel, Including Information Regarding Flores

Rights / Flores / Release Information

Resident Allegations

Residents say they did not receive clear children's-rights information or I-770 notices and did not understand Flores protections or release options.

ICE Responses / Position

Residents watch a Brief Explanation of Your Rights video during orientation to the facility. During orientation, facility rules, expectations, and the grievance process are also discussed with residents in different languages through Language Line.

Immigration rights information is reinforced through tablet-based rights videos, town halls, and daily ICE open-door hours. Form I-770, Notice of Rights and Request for Disposition, is provided as part of the intake and bed-space request process and advises the recipient of the right to use the telephone, the right to be represented by a lawyer, and the right to a hearing before a judge. (See Exhibit 4)

The FSA Exhibit 6 Notice of Rights is likewise provided and includes a certificate of service documenting that the notice was served and read in a language understood by the family. The records further indicate that the field office responsible for the arrest serves the I-770 as part of intake and bed-space processing and that, if the form has not been served before arrival, the Dilley Intake Officer prints the required forms and provides them to the family unit upon arrival. The same procedure applies to Form M-444, Information About Credible Fear Interview, and the reviewed materials indicate that Flores-related documents are served at intake to each arriving family unit. Acknowledgment forms are signed when the I-770 and Flores Notice of Rights are provided, residents sign a 17-100A Orientation Checklist upon completion of orientation, and facility rules and expectations are posted in the activity room and included in the Resident Handbook.

DHS Form I-770 Final
Blank.pdf

Legal Access / Communication

Resident Allegations

Residents report unreliable mail and email access, limited free legal calling options, blocked or inconsistent Gmail access, and difficulty reaching Flores counsel or non-pro bono attorneys.

ICE Responses / Position

The legal-access materials reflect that Know Your Rights videos are available during orientation, play on a continuous loop in intake, are accessible on Talton tablets, are available in the library, and may be viewed on Channel 61 televisions in the living suites. These materials are available in multiple languages, and additional languages are being added. Pro bono legal-services information is provided to residents upon arrival and posted throughout the facility, including in activity rooms, phone rooms, the library, intake, courts, visitation, medical, and dining areas, with monthly updates.

The April 2026 pro bono lists for the San Antonio Immigration Court and Pearsall Immigration Court identify multiple legal-service providers, including American Gateways, RAICES, St. Mary's University School of Law Immigration and Human Rights Clinic, CT Lobos y A Inc., the University of Texas School of Law Immigration Clinic, and the ABA Commission on Immigration Detention Information Hotline. The Pearsall list also includes a RAICES hotline specifically for individuals and families detained at Dilley.

Gmail access was restored on March 6, 2026, through library computers; internet access is permitted except for social media and adult content; LexisNexis is available; and confidential legal visits remain available. Residents receive at least one free intake call, and indigent residents may request free domestic calls from unit managers at any time, including for legal calls. Residents may also make direct or free calls to specified legal and governmental entities, subject to reasonable restrictions on hours, frequency, and duration, but not in a manner that unduly limits efforts to obtain legal representation.

ICE is currently exploring the most efficient way to implement library scheduling for residents with deadlines and provide a multilingual Legal Access Guide explaining free call options, library rules, and how to request additional time.

Grievance System / Fear of Using It

Resident Allegations

Some residents say they were never taught how to file grievances or fear retaliation if they complain.

ICE Responses / Position

Review of both weekly compliance snapshots and broader grievance-log information reflects a downward trend in total grievances filed during the February-through-April 2026 period. Total grievances decreased from 26 in February to 18 in March and 11 in April, for a total of 55 grievances.

By grievance type, paper grievances exceeded Talton grievances in February, by a margin of 15 to 11, and in April, by a margin of 6 to 5, while Talton grievances exceeded paper grievances in March, by a margin of 12 to 6. Facility Staff was the most frequently cited grievance category overall, accounting for 30 of the 55 grievances filed during the review period. In April, all 11 grievances were coded under that category.

Disposition Code 3, Not Found in Favor of Inmate/Resident, was the most common disposition and accounted for 44 of the 55 grievances during the review period. Two grievances were found in favor of the residents during the February-through-April 2026 reporting period, including one in February and one in April. At the time of data extraction, three April grievances reflected blank disposition codes and are treated in this Report as pending or blank.

A review of repeat grievance activity showed that 29 of the 55 grievances were submitted by repeat grievance filers, representing six residents during the February-through-April review period. This count reflects the consolidation of entries for resident A451 as a single individual despite variation in initials in the source data.

The broader record also reflects that residents may raise concerns through direct staff communication and the formal grievance process, and that allegations are tracked through the Incident Reporting System, the Talton Grievance Log, and OMS Contact Logs.

ICE is working to post a multilingual grievance instruction sheet, report grievance metrics to increase transparency, and conduct periodic interviews or surveys to test understanding and confidence in the process. (See Exhibit 5)

DIPC Grievance Metrics Summary February–April 2026

Grievance Metrics			
Month	Total Grievances	Founded Grievances	Founded Grievance Details
February 2026	26	1	Hygiene-supplies issue; third-shift staff did not provide requested tissue and paper towels and directed the resident to wait until morning. Supervisors reinforced staff responsibilities and expectations.
March 2026	18	0	No founded grievances identified in the March 2026 materials reviewed.
April 2026	11	1	As of April 23, 2026, the details of the founded grievance are pending receipt from facility.

FEB-APR 2026
GRIEVANCES_redact

3. Allegations that Class Members Are Not Provided Safe and Sanitary Conditions, Including Adequate Medical Care, Child-Friendly Food, Hygiene Products, and Healthy Sleeping Conditions

Medical Care

Resident Allegations

Families report delayed or inadequate care for serious conditions, long waits, limited diagnostics, and reliance on over-the-counter medication in cases they consider more serious.

ICE Responses / Position

The inspection, hospitalization, accommodation, and operational materials reviewed for the reporting period reflect that medical and related resident-care standards remained compliant during the February, March, and April 2026 inspection period under the 2020 FRS and applicable Flores requirements.

IHSC's December 17, 2025, focused review found no systemic deficiencies in intake screening, sick call, chronic care, medication administration, emergency response, or behavioral health services. The record further reflects 24-hour medical coverage, offsite referrals as needed, routine wellness checks, and 23 hospital or emergency room visits since January 1, 2026.

A January 20–21, 2026, inspection by ICE's independent medical subject matter expert reflected a favorable review of DIPC's medical and medically related operations during the inspection period. In the sections addressing health care, women's health services, environmental health and safety within medical settings, hunger strikes, suicide prevention, disability-related accommodation processes, medical grievances, and medical post orders, the facility was found compliant with applicable standards.

The report indicates that intake screenings, health assessments, sick call, mental health services, infection-control practices, medication management, and medical documentation were conducted within required timeframes and in accordance with applicable procedures. It also notes that pregnant residents received onsite and offsite specialty care as needed, no hunger strikes or deaths were reported, and no significant deficiencies were identified in the medical areas reviewed. The only notable concerns were staffing levels in certain medical positions and the absence of a formal keep-on-person medication policy beyond rescue inhalers.

A March 24, 2026, Quality Assurance Review by ICE's independent medical subject matter expert confirmed the availability of round-the-clock medical services, the prioritization of

children for care, the use of offsite referrals when clinically indicated, and ongoing wellness monitoring. At the same time, that review indicated that certain protocols could be further formalized and that some medical allegations could not be substantiated due to insufficient records or detail. Taken together, these reviews reflect that the medical system at Dilley was functioning during the reporting period, while also identifying opportunities to improve coordination, documentation, and communication.

An April 14–16, 2026, inspection by ICE’s independent medical subject matter expert completed a compliance inspection of DIPC’s medical and closely related functional areas. Those areas included health care, environmental health and safety within medical settings, women’s health services, suicide prevention, disability-related accommodation processes, medical grievances, and other clinically related or medically adjacent functions. In those areas, the facility was found to be compliant with applicable standards.

As part of the April 14–16, 2026, compliance inspection, DIPC’s medical department, together with ICE’s independent medical subject matter expert, conducted a comprehensive review of the resident declarations submitted by Plaintiffs to the Court on March 23, 2026, including a separate April 15, 2026, medical review of twelve additional cases. The results are in Exhibits 6, 7, and 8.

6 - 35 cases.pdf

7 - 12 medical
cases.pdf

Hospitalizations_re
dacted.xlsx

Overall Assessment

Within the medical and related areas reviewed, the inspection reflected general compliance with applicable standards. The completed portions of the inspection indicated that policies, logs, staffing practices, and clinical procedures were consistent with required expectations. The strongest and most developed findings concerned health care operations, medical environmental health and safety, medical aspects of sexual abuse and assault prevention and intervention, women’s health services, suicide prevention, disability accommodation processes, medical grievances, resident transfers involving medical documentation, and medical post orders.

Key Strengths

The most substantial findings appeared in the Health Care section. The review found timely mental, physical, and dental intake screenings; adult comprehensive health assessments completed within 14 days; and child assessments completed within 48 hours. Sick calls were available daily, medical privacy was maintained, and infectious disease protocols were documented and understood by staff. The review also confirmed designated medical leadership and verification of professional licenses.

The Environmental Health and Safety findings, as they relate to medical operations, were likewise favorable. Hazardous materials were inventoried and secured, sharps containers were

properly placed and not overfilled, medical areas were inspected daily, handwashing signage was posted throughout appropriate areas, and audits of sharps and medical instruments were documented. Records were described as accurate, staff as knowledgeable, and required audits as occurring on a daily, weekly, and quarterly basis.

In the Sexual Abuse and Assault Prevention and Intervention area, the inspection reported no incidents since the prior inspection, confirmed that relevant policies remained in place, and noted staff training, public reporting information, and classification-related controls. From a medical and response standpoint, staff appeared to understand how to assess, identify, and respond appropriately when necessary.

The Grievance System also reflected continued compliance in the medical area. Two medical grievances predating the inspection, involving medication access and the sick call process, were addressed within required timeframes and communicated appropriately.

Notable Issues and Follow-Up Items

Although the reviewed medical and related sections were broadly positive, several matters warranted follow-up. The Health Care section identified staffing vacancies, including openings for registered nurses, mental health coordinators, medical records staff, a physician, a psychiatric nurse practitioner, and other support positions. While services were still being delivered within required timeframes, those vacancies could create capacity concerns if census increases.

The review also noted the absence of a formal Keep on Person medication policy, apart from the handling of rescue inhalers. The record indicates that staff had discussed the need to formalize guidance for rescue medications kept in residential areas and planned to develop policy language.

In addition, the inspection documented one child TB-positive screening case from April 3, 2026, with follow-up care and coordination with the Department of Health and a TB specialist. The record presents that matter as appropriately managed rather than as a compliance deficiency.

Broader Medical Context

Although the facility's overall inspection ratings moved from partially compliant in February to Compliant with Issues in March, to Compliant in April, the identified deficiencies did not concern core medical standards. Instead, they involved staff-resident communication, post orders, use of physical control measures and restraints, and education policy. The inspection record continued to reflect compliance in Health Care, Health Care (Females), Sexual Abuse and Assault Prevention and Intervention, Hunger Strikes, Personal Hygiene, Terminal Illness / Advanced Directives / Death, and Disability Identification, Assessment, and Accommodation.

Hospitalization activity from February through April 2026 was also reviewed. Five hospitalization events were reported in February, with none reported in March or April as of April 19, 2026. Those events included treatment for severe anemia, abdominal pain resulting in

transfer and tumor-resection surgery after imaging identified a 30-centimeter mass, one labor-and-delivery hospitalization, and two hospital transports involving the same minor for respiratory distress.

The record also reflects continued procedures for residents with special needs who require medically approved sensory items or therapeutic supports. Where approved items are not otherwise available in resident property, Medical and Unit staff coordinate to obtain them. Medical review procedures, accommodation practices, and wellness-check procedures remained in place during the reporting period.

Lastly, ICE's independent medical subject matter expert conducted an onsite assessment of the DIPC medical program and reviewed the 35 medical complaints submitted by the Flores Plaintiffs on March 20, 2026, during the April 14–16, 2026 site visit.

Conclusion

Taken together, the inspection, quality-assurance, and case-review materials from the February through April 2026 reporting period indicate that DIPC's medical and medically related operations remained functional and compliant with applicable standards. The record reflects ongoing access to care, timely screening and assessment, continuous medical coverage, use of offsite referrals when clinically indicated, routine wellness monitoring, and continued compliance in core medical areas, including health care, health services, infection control, suicide prevention, disability-related accommodation processes, and medical grievances. At the same time, the reviews identified several areas for continued attention, including staffing levels in certain medical positions, further formalization of selected protocols, development of a broader keep-on-person medication policy, and continued improvement in documentation, coordination, and communication. Overall, the materials reviewed do not support the finding of systemic medical noncompliance during the reporting period but instead reflect an operational medical system with identified opportunities for refinement and enhancement.

Food Service

Resident Allegations

Residents describe food as spicy, greasy, repetitive, and sometimes poor in quality, with concerns about child-friendliness and denied special diets.

ICE Responses / Position

The food-service materials reviewed reflect that the facility maintains structured procedures for food procurement, inspection, preparation, service, and monitoring. All food items are purchased through the facility's food-service vendor, Sysco Foods, and are inspected upon arrival for quality and freshness before acceptance. Managers and shift supervisors involved in food service are trained in food safety and sanitation through SERV Safe-certified programs, and food safety oversight extends through receipt, storage, preparation, cooking, holding, service, and post-service review.

The records further show that food complaints are investigated when brought to the attention of the facility and that grievance tracking is monitored. Weekly menu surveys are also conducted with residents to gather feedback regarding food service and resident satisfaction. According to the materials reviewed, no food complaints were brought to the attention of the Food Service Department during the current reporting period.

With respect to food-safety concerns such as mold, contamination, or foreign substances, the records reflect that any affected item is removed from service and separated for review and disposal and that, where necessary, the issue is traced to determine whether it arose during delivery, storage, preparation, or service. One sample of each breakfast, lunch, and dinner meal is also saved and frozen.

The nutrition program operates on a dietitian-approved rotational menu designed to meet age-appropriate caloric and nutritional standards. The records show that vegetables are offered with every meal, fruit rotates regularly, a salad bar with fresh vegetables is prepared for every meal, and fresh fruit is offered daily in the housing complexes. Child-friendly menu items are also included in a manner intended to preserve overall nutritional adequacy.

The materials further reflect that dietary accommodation is available through established channels. Residents may request religious diets through a form, Talton, or the Chaplain, and no religious diet requests have been denied. Medical diets are identified and ordered during intake, the initial physical examination, or at any later point during a resident's stay if medically indicated. Infant formula, stage-appropriate baby food and purees, whole milk for age-eligible children, and modified meal portions for younger children are also provided through established operational channels. Snacks, including cookies, milk, juice, and apples, are available in each complex from 0800 to 2000 and are replenished by counselors at least twice daily or more often as needed.

The weekly diet roster summaries for February, March, and April 2026 further reflect a structured diet-accommodation process that tracks special meal needs across meal service, dining location, and housing-related distribution points. Taken together, those records show an established system for identifying residents who require modified meals and routing those accommodations through separate roster groupings and menu references. The most common accommodation patterns reflected in the records include health-related diets, halal diets, pregnancy-related meal modifications, diabetic diets, soft-food or dental-mechanical diets, lactose-related restrictions, vegetarian accommodations, and allergy-based substitutions or exclusions. The materials also reflect more individualized restrictions tied to specific food sensitivities, indicating that the process is used for both broad diet categories and resident-specific medical or religious needs.

The halal materials reviewed also reflect a more developed program than a simple resident list. In addition to resident rosters, the file set includes a rotating halal menu structure with meal-by-meal planning and substitute menu support, indicating that halal service is being managed as a

recurring operational program rather than as an informal accommodation. The presence of a separate Ramadan list in some of the later rosters further suggests that religious-meal administration was being adapted to changing observance needs.

From an operational perspective, the records reflect a meaningful effort to document meal delivery at the meal level and to separate general special-diet tracking from location-specific service lists. At the same time, the spreadsheets reflect data-quality issues that may affect clarity and downstream reporting, including inconsistent diet labels for similar accommodations, spelling and formatting variations, occasional blending of resident and diet information in the same field, and date entries that do not appear fully standardized.

Taken together, the materials reflect that food service and dietary accommodation were being actively administered through a recurring and organized process, with separate attention to medical, religious, pregnancy-related, and allergy-related needs. The principal weakness reflected in the record is not the absence of a food-accommodation process, but the consistency and organization of the documentation used to track and defend that process. (See Exhibits 9 and 10)

Weekly Diet Roster Summary							
<i>Counts reflects primary weekly roster sheets only; duplicate dining location tabs were excluded.</i>							
Week	Diet for health	Halal	Ramadan Sub.	Allergy Sub.	Pregnancy/Fruit	All Other Categories	Total
Dec 27 - Jan 2	74	65	0	16	9	17	181
Jan 10 - Jan 16	108	83	0	17	15	28	251
Jan 17 - Jan 23	110	82	0	17	15	27	251
Jan 24 - Jan 30	73	27	0	10	9	20	139

Apr 4 - Apr 10	61	26	28	3	3	10	131
Reading notes							1063
The chart shows the top five most visible recurring categories.							
All other categories' combines diabetic, soft/mechanical, vegetarian, dairy/lactose, and smller medical labels.							
Ramadan sub appears only in later weeks because it was tracked separately there.							

DIPC 2026
MEDICAL DIETS (PF)

DIPC HALAL - 2026
NUTRITION STATEME

Water

Resident Allegations

Families report poor-quality tap or filtered water, concerns about infant formula preparation, and inequitable access to bottled water.

ICE Responses / Position

Residents are provided with access to potable water in the housing units as part of daily operations at DIPC.

Municipal utility services support food preparation, sanitation, and overall residential operations. Bottled water for infants under 12 months of age is provided for preparation of infant formula without the need for a medical order. Residents with diarrhea are evaluated and treated by medical staff as clinically appropriate, and bottled water is not itself treated as a medical intervention for diarrhea.

Independent microbial water-quality monitoring conducted by the City of Dilley during the reporting period showed Total Coliform absent in 100 percent of samples, E. coli absent in 100 percent of samples, chlorine residuals absent in 100 percent of samples, and compliant regulatory status for all reporting months reviewed. The City of Dilley public water system maintained full compliance with TCEQ microbial water-quality standards during the reporting period, and Brita water filters were installed in housing units to support resident access to filtered drinking water to address flavor concerns.

Bathrooms / Hygiene

Resident Allegations

Residents say bathrooms and showers are unsanitary, cleaned too infrequently, lack privacy, and that only harsh soap is consistently available.

ICE Responses / Position

Bathroom and hygiene concerns fall within the broader review of hygiene, sanitation, and general living conditions. The inspection and operational materials reviewed during the reporting period continued to reflect compliance with personal-hygiene-related standards and broader safe-and-sanitary-condition requirements.

More specifically, sanitation was monitored through regular CSO inspections and compliance and activity reviews. Hygiene items were routinely issued and replenished, and resident supervisors assessed the need for extra cleaning as needed.

The records further reflect that the February founded grievance concerning hygiene supplies resulted in reinforcement of staff responsibilities and expectations.

Sleep

Resident Allegations

Families report bright lights, loud air conditioning, night checks, thin mattresses, and crowding that prevent children from sleeping.

ICE Responses / Position

Overnight lighting practices were evaluated together with the measures used to reduce sleep disruption while preserving required safety and welfare checks. In the common areas of the living suites, two of the four overhead light banks remain illuminated overnight using lower intensity 3000K soft white lighting. This arrangement is intended to maintain facility security standards while reducing brightness during sleeping hours and allowing resident supervisors to

conduct routine safety checks and observe residents' safety and well-being without entering the living suite. Selected bulbs were replaced with lower intensity 3000K soft white lighting as part of the effort to reduce brightness while preserving sufficient visibility for staff supervision and safety checks. Residents are informed of lighting-related rules and practices during orientation with the unit team, through the Resident Handbook, and through posted rules in the activity rooms. No grievances relating to overnight lighting have been filed since January. Plug-in nightlights were evaluated as a possible alternative but were determined to be insufficient for staff to conduct required safety and welfare checks without entering housing areas. Residents are provided with an eye mask during intake and may request additional eye masks as needed. Residents may not hang blankets or other items to block light because doing so obstructs resident supervisors' view during security rounds.

If a minor is experiencing sleep disruption, medical services are available twenty-four hours a day, seven days a week, and a parent may bring the child to the medical department for assessment. Where appropriate, medical staff may refer the child to the mental health department for further evaluation and support. Children also receive weekly mental-health wellness checks, with more frequent follow-up when indicated.

Mental Health

Resident Allegations

Residents describe anxiety, depression, panic attacks, regression in children, and mental-health care they view as limited or too narrowly focused.

ICE Responses / Position

Mental-health services are available onsite from 7:00 a.m. to 10:00 p.m. and are on call during overnight hours if needed. Children receive weekly wellness checks and more frequent follow-up when indicated. Where medical staff identify issues such as sleep disruption or related concerns, referrals to mental health may be made for further evaluation and support. Mental-health services are also reflected as part of the facility's broader resident-care structure during the reporting period. The medical review and inspection materials did not identify systemic behavioral-health deficiencies during the periods reviewed.

Disabilities / Special Needs

Resident Allegations

Parents report inadequate accommodations for autism, ADHD, developmental delay, and complex medical conditions, including limited special diets or therapies.

ICE Responses / Position

The materials reviewed reflect continued compliance in Disability Identification, Assessment, and Accommodation during the reporting period. Residents with special needs who require sensory items or therapeutic toys identified at intake or during the initial physical examination may receive medically approved supply orders, and Medical and Unit staff coordinate to obtain

those items when necessary. In the educational context, additional special-education support is also being expanded through approved staffing and outside coordination, including the approved Successful Practices Network (SPN) contract for a certified Educational Counselor and licensed Special Education instructor.

Commissary / Costs

Resident Allegations

Residents say they must purchase basic items such as hygiene supplies, diapers, bottled water, food, and phone time, forcing trade-offs between basic needs.

ICE Responses / Position

All residents are provided with clothing, hygiene, and infant-care items at no cost upon intake and through routine distribution. Families with infants receive an additional infant care package with child-specific supplies. The standard hygiene kit includes soap, shampoo, toothbrush and toothpaste, deodorant, feminine hygiene products, toilet paper, towels, and a laundry bag. Infant packages include diapers, wipes, baby soap and shampoo, diaper rash ointment, lotion, and baby towels. These items are provided at no cost and replenished upon request through housing staff, the nursery, or medical staff to ensure families always have adequate hygiene and child-care supplies. Replacement items may be requested from Unit Management Staff or Resident Supervisors in each housing complex.

The commissary is intended for extra or preferred items.

Infant Care Package Contents

Standard Package Provided to Families with Infants

Category	Item	Quantity / Description
Diaper & Hygiene Essentials	Diapers	20 disposable diapers (size based on infant's age)
	Baby Wipes	1 pack (72-count)
	Diaper Cream	1 tube (2 oz)
Feeding & Formula Supplies	Bottled Water for Formula	6 bottles (16.9 oz each)
	Infant Formula	1 can (12.4 oz powdered formula)
	Baby Bottle & Liners	1 bottle (8–10 oz) with 5 disposable liners
Additional Infant Care Items	Baby Shampoo	Included
	Baby Wash	Included
	Baby Lotion	Included
	Baby Powder	Included

DIAPER & HYGIENE

3

Essential items

FEEDING & FORMULA

4

Hygiene products

Package Highlights

- ✓ **Comprehensive Care:** 10 distinct items covering diapering, feeding, and hygiene needs
- ✓ **Age-Appropriate:** Diapers sized based on infant's age; formula and bottles for feeding
- ✓ **Ready-to-Use:** Includes bottled water for formula preparation and disposable bottle liners
- ✓ **Complete Hygiene:** Shampoo, wash, lotion, powder, wipes, and diaper cream for comprehensive skin care

Clothing / Shoes**Resident Allegations**

Families report too few clothes and shoes, poor durability, and slow replacement of damaged items or cold-weather gear.

ICE Responses / Position

The clothing-related materials reviewed reflect that, upon intake, resident minors are issued age-appropriate clothing, footwear, and seasonal outerwear. According to the records, minors receive three sets of clothing, six undergarments, six pairs of socks, six bras as applicable, two pairs of shoes, one pair of shower shoes, winter coats or seasonally appropriate clothing, up to three sets of pajamas, caps or beanies, gloves, and hair ties for girls.

The records further reflect that residents may request additional clothing as needed based on normal wear and tear, seasonal conditions, and documented individual need. Laundry facilities are located within the housing units, and detergent and related supplies are provided at no cost.

The materials also show that there were no clothing constraints or shortages during the reporting period. Inspection observations indicate that intake clothing storage areas were well stocked, that

available clothing inventory ranged in size from newborn to adult, that jackets and other outerwear were available, and that residents were observed wearing clean, weather-appropriate clothing.

Taken together, the materials reflect that clothing-related needs were addressed through intake issuance, replacement procedures, on-unit laundry access, and maintained inventory during the reporting period.

4. Allegations that Education Remains Inadequate for Older Youth

Education Policy

Resident Allegations

Residents report that, although younger children have shown some improvement, older youth continue to lack a comprehensive educational program and still face limited instruction and uncertainty regarding online learning.

ICE Responses / Position

The Educational Policy section was rated Compliant with Issues. The principal issue identified was that the Special Education Team had not yet been established, rendering that component non-compliant.

Overall Assessment

The inspector's notes reflect that an education program was in place and operating, but that important elements of the program were still under development. While classroom instruction, library access, and curriculum planning were underway, the section identified deficiencies significant enough to support a rating of Compliant with Issues rather than full compliance.

Positive Observations

- The education program began on March 2, 2026.
- Classroom instruction was observed in multiple grade bands, including pre-K to Grade 2, Grades 3–6, and Grades 6–12, as well as physical education and art.
- Students in the upper grades were described as engaged in instruction and able to work at their own pace.
- In the Grades 3–6 classroom, students were engaged and had access to multilingual materials.
- The pre-K classroom had age-appropriate furniture, covered outlets, and learning-center materials.

- Physical education was active and participatory.
- The library was well stocked, including substantial English and Spanish-language holdings, with other languages available upon request.
- The curriculum was being developed using Texas State Standards and the Texas Early Learning Guidelines.

Issues Identified

- Initial assessment practices focused solely on the Dynamic Indicators of Basic Early Literacy Skills (DIBELS), a tool designed to screen and monitor early literacy skills in children. At that time, no broader educational assessments were conducted beyond DIBELS.
- In the pre-K to Grade 2 classroom, instruction was not differentiated, and older students were bored because the work focused on kindergarten-level concepts.
- Although the posted schedule reflected one hour for core subjects, observed instruction lasted only about 20 to 30 minutes.
- Computers had been installed but were not yet being used to support instruction because software was still being loaded.
- No textbooks were in use; instruction relied heavily on copied worksheets.
- Many classroom resources and manipulatives were not being fully utilized.
- Teachers were not required to be certified under the contract modification, and only one certified teacher was on staff at the time.
- Most significantly, the Special Education Team had not yet been created, despite being required under the standard.
- The site also reported that there were no identified students receiving special education services.

Basis for Rating

The section was rated Compliant with Issues because the education program was functioning in several respects, but important structural and instructional areas for improvement remained. The most significant of these was the absence of the Special Education Team, which rendered that component non-compliant and weighed heavily in the overall section rating.

Broader Educational Context

Education remained a primary focus during the reporting period, with the facility organizing educational programming tailored to each student's initial assessment and age range, and

providing instruction in core subjects using resources such as Khan Academy and Khan Academy Kids. Khan Academy is a free online learning platform offering instructional videos, practice exercises, and personalized learning in subjects like math, science, and more for students of all ages, while Khan Academy Kids is a free educational app for young children (ages 2–8) featuring interactive lessons, games, and activities focused on early literacy, math, and social-emotional skills.

The initial assessment completed for each student assists in developing an individualized understanding of the student's educational level and instructional needs and in placing students more appropriately within the educational program. The records further reflect that the facility expanded classroom resources for older students, including access to computers and multiple educational websites that provide adaptive content responsive to students' academic levels and instructional needs. Teachers on staff are developing differentiated classroom activities intended to provide multiple avenues of learning and to better address varying academic levels and needs.

With respect to special education, the records reflect that the contract with SPN has been approved and finalized and that a certified Educational Counselor and a licensed Special Education instructor will be onsite to develop IEPs, 504 plans, and related educational supports. The records also show that the superintendent at Dilley Independent School District agreed that, if special education assistance is needed before the new SPN staff come onboard, such assistance would be provided.

The review also reflects that classroom instruction began on March 2, 2026, and that indoor and outdoor recreation is available daily from 8:00 a.m. to 8:00 p.m. without limitation to residents. Structured programming includes a broad range of creative and recreational activities, including bead bracelet making, jewelry box construction and decoration, birdhouse building, yarn weaving, crocheting, canvas painting, journaling, sports and game tournaments, relay races, hula hoop activities, tug-of-war, Zumba sessions, karaoke, bingo, and chalk art. Outdoor play structures, age-appropriate toys, multilingual books, and cribs are available for young children; activity rooms are open from 8:00 a.m. to 8:00 p.m.; toys are sanitized nightly; residents may check out library books for five days; and children are provided coloring pages they may keep in their living suites.

Conclusion:

The inspector's narrative indicates that the education program was operational but still in the process of being fully developed. The review highlighted the ongoing need to establish the Special Education Team, as well as opportunities to further enhance assessment practices, instructional differentiation, staffing qualifications, and the use of available educational resources as the program continues to expand.

5. Allegations about Harsh Staff Treatment

Retaliation / Lockdowns / Protests / Visits

Resident Allegations

Declarations describe room confinement, protest-related restrictions, and movement controls during visits that residents perceived as punitive.

ICE Responses / Position

DIPC policies and procedures prohibit retaliation. Policy 14101, Resident Grievance System, prohibits staff from harassing, disciplining, punishing, or otherwise retaliating against any resident for filing a grievance, and that prohibition is also reflected in the Resident Handbook.

Force / Threats / Coercion

Resident Allegations

Some residents allege pushing, threats, coercive language, or intimidation by staff, including threats involving foster care or punishment.

ICE Responses / Position

The records further reflect that concerns regarding staff conduct, tone, and professionalism may be raised through direct communication or the grievance process. Where grievances are substantiated, available measures include staff counseling, supervisory review, and reinforcement of operational and professional expectations.

Isolation / Room Searches / Confiscation

Resident Allegations

Residents report targeted room searches, confiscation or destruction of personal items, and room-level isolation or observation they viewed as punitive.

ICE Responses / Position

The policies and operational materials reviewed reflect that the facility distinguishes between systemic disruptions, emergency movement restrictions, routine search procedures, and ordinary operations through established definitions and written procedures. The records further reflect that operations remained secure during the reporting period and that there were no facility-wide lockdowns or emergency responses.

Searches of suites and holding areas may be performed unannounced, on an irregular basis, and in an orderly manner. When possible, an area should be left as it was found, and resident property is to be respected and not carelessly discarded, misplaced, or broken.

During the January-February 2026 protest-related activity, certain handwritten signs, drawings, artwork, and written communications associated with the protest were collected because they were considered unauthorized protest-related materials under housing-unit rules and were treated as soft contraband under policy. The confiscated items were limited to protest-related materials not authorized by policy, and no personal property was destroyed during housing searches. No

searches were conducted in relation to the March and April protests, and no protest-related materials were collected during those later events.

Taken together, the materials reflect that search practices and the handling of protest-related materials were carried out under established written procedures, with protest-related items treated as unauthorized soft contraband rather than as a basis for broader punitive action.

6. Allegations about Lack of Language Translation

Language Access / Translation

Resident Allegations

Families report inadequate interpretation services and say they are sometimes asked to sign documents they do not understand.

ICE Responses / Position

Rights materials and orientation content are available in multiple languages and that interpreter availability is available via the language line.

As of April 13, 2026, the handbook is now available in Arabic, Bengali, Creole, English, French, Hindi, Portuguese, Punjabi, Romanian, Russian, Spanish, Turkish, Ukrainian, and Vietnamese, ensuring access for most residents. For residents who require information in another language, the Language Line is utilized.

X. Conclusion

This Juvenile Coordinator's Supplemental Report provides the Court with a consolidated account of ICE's handling of Flores class members in custody during February, March, and April 2026, including minors held more than 20 days in FRCs, hotel placements exceeding 72 hours, and conditions of confinement at the DIPC. Drawing on based automated data, hotel-stay records, facility compliance reports, independent inspections, medical reviews, grievance logs, and Plaintiffs' submissions, the Report addresses the specific items identified in the Court's April 3, 2026, Order and summarizes ICE's compliance with applicable FSA requirements during the reporting period.

With respect to minors held more than 20 days, ICE identified 567 case entries involving Flores class members in FRC custody during February and March 2026. During this reporting period, the "20+ days in custody" Flores cohort at FRCs declined notably. The February 2026 FRC 20+ Days report identified 426 Flores class members who had been in DHS custody for 20 days or longer, compared to 141 in March 2026, representing approximately a 67 percent reduction in the 20+ day FRC cohort between these two months. These figures are based on automated FRC 20+ Days reports and reflect records meeting the 20+ day reporting criteria for each month; some

individuals may appear in both months if they remained in custody across the reporting periods (see Exhibit A). Time in Custody and FLOS data further show that most cases remained clustered between 20 and 60 days, with longer custody periods generally associated with ongoing administrative or immigration proceedings, appeal activity, post-order processing, travel document coordination, or removal logistics rather than unexplained delays.

With respect to hotel use, ICE identified 86 minors whose hotel-placement sequences exceeded 72 hours in February and March 2026. Those placements, summarized in Exhibit B, were primarily driven by transportation and removal logistics, including pre-removal staging, flight scheduling and disruption, port-of-entry or consular coordination, family-unit or reunification considerations, and quarantine- or facility availability factors. Where hotel stays exceeded 72 hours, the records reflect that placements continued while ICE coordinated the next required step—such as removal, voluntary departure, voluntary return, release, or related onward travel—and that use of hotels remained tied to transit or staging needs.

Conditions-of-confinement materials reviewed for this period—including weekly Compliance Standards Officer reports, the independent inspection contractor’s February–April 2026 inspections, IHSC and independent medical reviews, and grievance and operational records—reflect that DIPC generally operated in a stable and compliant manner. The independent inspection contractor documented measurable improvement over three consecutive inspections, from a partially compliant rating in February, to Compliant with Issues in March, to an overall Compliant rating in April, with Education Policy (FRS 5.2) remaining Compliant with Issues due to the pending establishment of the Special Education Team. Medical and medically related standards were found compliant during the inspection and quality assurance reviews, with 24-hour medical coverage, offsite referrals as needed, and functioning systems for screening, sick call, mental health services, and medical grievances, while also identifying staffing and protocol formalization needs as areas for continued attention.

The record further reflects structured systems for food service and diet accommodation, potable and filtered water, hygiene and sanitation, lighting and sleep-related practices, mental health services, disability-related identification and accommodation, clothing issuance and replacement, and grievance and legal access processes. Grievance data show a total of 55 grievances filed from February through April 2026, with two substantiated and the remainder not found in favor of the resident, alongside a downward trend in total grievance volume and continued availability of both formal and informal reporting channels. At the same time, the reviews and Plaintiff declarations have highlighted areas where communication, documentation, transparency, and resident understanding—particularly regarding grievances, legal access, and education for older youth—can be strengthened.

ICE acknowledges the concerns raised by Plaintiffs regarding prolonged detention, legal information and access, safe and sanitary conditions, education, staff conduct, and language access. In response, ICE and facility staff have undertaken and planned measures described in

this Report, including enhanced grievance and legal access guidance, continued scaling and refinement of the education program (with particular focus on older youth and special education capacity), ongoing medical and mental health program enhancements, and sustained oversight of hotel use and FRC custody duration for Flores class members. ICE will continue to monitor the 20+ day cohort, hotel placements, transportation and case processing drivers of length of stay, and conditions of confinement at DIPC; will implement corrective and preventive actions where issues are identified; and will report to the Court as required, with the goal of ensuring that Flores class members are treated in a manner consistent with the FSA and applicable standards.

EXHIBIT A

FRC 20 + Days Report: February – March 2026

This document is based on data from the ICE Integrated Decision Support (IIDS) system, a data warehouse that contains dynamic data extracts from the Enforcement Integrated Database (EID).

Source: IIDS data as of April 14, 2026.

ICE Family Residential Center 20-day Report
February and March 2026

ERO Non-Detained Management Division

Family Residential Center Population Detained 20+ Days Report - February 2026

The following document was created based on ICE Integrated Decision Support (IIDS)
IIDS is a data warehouse that contains dynamic data extracts from the Enforcement Integrated Database (EID).
Source: IIDS data as of 3/31/2026.

Notes:
Data reflects Family Unit Individuals who have been detained 20 days or longer, booked into a Family Residential Center, and booked out between 2/1/2026 and 2/28/2026 or were in custody as of 2/28/2026.
Detention length of stay was determined by calculating the time (in days) between Apprehension Date and either Book-out Date or 2/28/2026 for those who remained in custody.
Facility Length of Stay (FLOS) was determined by calculating the time (in days) between Book-in Date and either Book-out Date or 2/28/2026 for those who remained in custody.
Family Unit Individuals that were in custody as of 2/28/2026 will appear on subsequent reports until no longer in custody.
Initial Book-in date was substituted for apprehension dates with data quality issues.

ERO Non-Detained Management Division
Family Residential Center Population Detained 20+ Days Report - March 2026

The following document was created based on ICE Integrated Decision Support (IIDS)
IIDS is a data warehouse that contains dynamic data extracts from the Enforcement Integrated Database (EID).
Source: IIDS data as of 4/14/2026.

Notes:
Data reflects Family Unit Individuals who have been detained 20 days or longer, booked into a Family Residential Center, and booked out between 3/1/2026 and 3/31/2026 or were in custody as of 3/31/2026.
Detention length of stay was determined by calculating the time (in days) between Apprehension Date and either Book-out Date or 3/31/2026 for those who remained in custody.
Facility Length of Stay (FLOS) was determined by calculating the time (in days) between Book-in Date and either Book-out Date or 3/31/2026 for those who remained in custody.
Family Unit Individuals that were in custody as of 3/31/2026 will appear on subsequent reports until no longer in custody.
Initial Book-in date was substituted for apprehension dates with data quality issues.

ERO Non-Detained Management Division

March FY2026 Juvenile Flores Report

The following document was created based on ICE Integrated Decision Support (IIDS)

IIDS is a data warehouse that contains dynamic data extracts from the Enforcement Integrated Database (EID).

Detainee and Detention History Source: DSSDM and ETL as of 04/23/2026

Placement Source: Data reported manually by JFMD staff.

Subject: Compliance Review of the Dilley Immigration Processing Center, Dilley, TX.

I. Compliance Summary:

On February 17-19, 2026, RiverTech conducted a scheduled compliance inspection of the Dilley Immigration Processing Center (DIPC). The inspection reviewed forty-three (43) standards across all seven (7) sections of the 2020 Family Residential Standards (FRS), incorporating the relevant requirements of the Flores Settlement Agreement (FSA).

II. Inspection Summary Results:

Standard	Type of Inspection	Finding
FRS		
1.1 Emergency Plans	Scheduled Monthly	Compliant
1.2 Environmental Health and Safety	Scheduled Monthly	Compliant
1.3 Transportation (by Land)	Scheduled Monthly	Compliant
1.4 Housekeeping Program	Scheduled Monthly	Compliant
2.1 Admissions and Release	Scheduled Monthly	Compliant
2.2 Contraband	Scheduled Monthly	Compliant

Other	Scheduled Monthly	Compliant

III. Center Overview

The DIPC is operated by CoreCivic under the oversight of ICE ERO's San Antonio Field Office. On February 17, 2026, the DIPC housed a total population of 763 residents. The average length of stay at the time of inspection was 52.52 days.

IV. Inspection Team

██████████, Compliance Reviewer
██████████

V. Overall Rating: Non-Compliant

VI. Compliant, Not Inspected, and Not Applicable Standards:

- 37 standards were rated compliant.
- One standard was not inspected:
- FRS 5.2 – Education Policy. From November 2025 through February 2026, the DIPC engaged in negotiations with two vendors to establish an education services contract; however, no agreements were finalized.
 - On March 2, 2026, the facility initiated an interim education program using facility-employed teachers to provide classroom instruction while the program continues to develop.
 - From March 17–19, 2026, an education subject matter expert assigned to JFMD’s inspection compliance provider will evaluate the progress of the DIPC’s current education program against the requirements of FRS 5.2. This evaluation will assess implementation progress but will not include a final rating.
 - A final rating will be issued after 30 days, or during the April 28–30, 2026 compliance review of the DIPC’s education policy.
 - During the April 28–30, 2026 review, JFMD’s independent compliance provider will re-inspect the DIPC’s education policy and assign a final rating at that time.

Three (3) standards were deemed not applicable based on the facility’s low average length of stay:

- FRS 5.3: Escorted Trips for Non-Medical Emergencies
- FRS 5.4: Marriage Requests
- FRS 5.5: Voluntary Work Program

VII. Non-Compliant Standards

- FRS 2.8 – Staff-Resident Communication. ICE supervisors did not consistently conduct required housing-unit visits. The issue was previously cited in the January 2026 inspection and required corrective action.
- FRS 7.5 – Post Orders. CoreCivic supervisors did not initial Post Orders to document required supervisory review. This issue was previously cited during the November 2025 inspection and remains a repeat finding.

VIII. Previously Non-Compliant Standard

- FRS 2.5 – Resident Census (Escape Incident)
 - Incident: On January 9, 2026, two residents escaped before the 0700 count, and the count was cleared.
- Corrective Action: On February 20, 2026, facility leadership reported that staff were retrained following the escape. Resident Supervisors now conduct face-to-name counts in each housing unit, verify residents’ locations, and report results to the Lieutenant in

Central Control.

IX. Overall Inspection Rating Recommendation:

- **Non-Compliant**

X. Conclusion and Justification:

The February 17–19, 2026 compliance inspection of the DIPC evaluated the facility’s adherence to the 2020 FRS and applicable provisions of the FSA. Of the standards reviewed, 37 were found compliant.

One standard, FRS 5.2 (Education Policy), was not inspected due to the absence of a finalized education services contract at the time of the inspection. The facility initiated an interim education program on March 2, 2026, and the standard will be evaluated during the next scheduled compliance review.

Three standards were determined to be not applicable based on the facility’s population characteristics and average length of stay.

Two standards were found non-compliant:

- FRS 2.8 (Staff-Resident Communication)
- FRS 7.5 (Post Orders)

Both findings represent repeat deficiencies previously identified during earlier inspections, indicating ongoing challenges in supervisory oversight and consistent adherence to established procedures.

While these deficiencies do not pose an immediate risk to resident safety or facility security, the recurrence of these findings demonstrates that prior corrective actions have not been fully implemented or sustained.

Although the facility successfully addressed the previously cited resident census issue associated with the January 9, 2026, escape incident through staff retraining and revised count procedures, the continued presence of repeat non-compliance indicates underlying systemic weaknesses in ICE and CoreCivic supervisory oversight and procedural compliance.

Due to the repeat non-compliance identified during this inspection, an overall rating of Non-Compliant is warranted, and the initiation of a formal corrective action plan is required.

III. Center Overview

The DIPC is operated by CoreCivic under the oversight of ICE ERO's San Antonio Field Office. At the time of inspection, the DIPC housed a total population of 763 residents. The average length of stay was 52.52 days.

IV. Inspection Team

██████████, Compliance Reviewer

V. Overall Rating: Compliant with Issues

VI. Compliant, Not Inspected, and Not Applicable Standards:

- Thirty-eight (38) standards were rated compliant.
 - Education Policy was not inspected; however, a Special Assessment Review (SAR) was conducted by an education policy subject matter expert (SME). A SAR is an additional facility inspection which does not fit into one of the categories of ICE inspections conducted to review performance of a facility, evaluate continuity of performance, or examine a particular facet of a facility's plan or operations.
 - FRS 5.2 – Education Policy. From November 2025 through February 2026, the DIPC engaged in negotiations with two vendors to establish an education services contract; however, no agreements were finalized.
 - On March 2, 2026, the facility initiated an interim education program using facility-employed teachers to provide classroom instruction while the program continues to develop.
 - From March 17–19, 2026, an education SME assigned to JFMD's inspection compliance evaluated the progress of the DIPC's current education program against the requirements of FRS 5.2. This evaluation assessed implementation progress but did not result in a final rating.
- Three (3) standards were deemed not applicable based on the facility's low average length of stay:
 - FRS 5.3: Escorted Trips for Non-Medical Emergencies
 - FRS 5.4: Marriage Requests
 - FRS 5.5: Voluntary Work Program

VII. Non-Compliant Standard

- One (1) standard was rated non-compliant during this inspection:
 - FRS 2.10 - Use of Physical Control Measures and Restraints. During review of the February 10, 2026, immediate use-of-force incident, the compliance reviewer determined that audiovisual recording equipment retrieved from the Emergency Response Team locker did not function properly. Corrective action is warranted to ensure audiovisual equipment is consistently maintained and operational.

VIII. Compliant with Issues

- No FRS was rated compliant with issues during this inspection.

IX. Previously Non-Compliant Standards

- FRS 2.8 – Staff-Resident Communication: During the January and February 2026 inspections, it was noted that ICE supervisors did not consistently conduct the required

housing-unit visits, and corrective action was recommended.

- FRS 7.5 – Post Orders: During the November 2025 and February 2026 inspections, it was noted that CoreCivic supervisors did not initial Post Orders to document required supervisory review.

During the current inspection, both FRS 2.8 and FRS 7.5 were found to be compliant. Continued monitoring in these areas is recommended to ensure sustained compliance and consistent implementation across all posts.

X. Conclusion and Justification:

The March 17–19, 2026, compliance inspection of the DIPC found 38 standards compliant, one standard not inspected, and three standards not applicable. Although FRS 5.2, Education Policy, was not inspected, a SAR was conducted by an education policy SME as a supplemental review of that operational area. Education Policy will be reviewed again during the April 2026 inspection, and a rating will be assigned at that time.

FRS 2.10, Use of Physical Control Measures and Restraints, was found non-compliant due to an operational weakness involving the readiness of audiovisual recording equipment during the February 10, 2026, use-of-force incident. While the deficiency did not rise to the level of a safety or systemic concern, corrective action is required.

Accordingly, the facility is assigned an overall rating of **Compliant with Issues**.

Other	Scheduled Monthly	Compliant

III. Center Overview

The DIPC is operated by CoreCivic under the oversight of ICE ERO's San Antonio Field Office. During the inspection, the Center population was 359 residents as of April 14, 2026, including 143 FAMU residents and 216 single females.

Inspection Team

[REDACTED], Project Coordinator
[REDACTED]
[REDACTED] Medical SME

[REDACTED], Education SME

IV. Overall Rating: Compliant

V. Compliant and Not Applicable Standards:

- Thirty-nine (39) standards were rated compliant.
- Three (3) standards were deemed not applicable based on the facility's low average length of stay:
 - FRS 5.3: Escorted Trips for Non-Medical Emergencies
 - FRS 5.4: Marriage Requests
 - FRS 5.5: Voluntary Work Program

VI. Non-Compliant Standard

- No standards were rated non-compliant during this inspection.

VII. Compliant with Issues

- FRS 5.2: Education Policy was rated Compliant with Issues during this inspection. Under Component 12, the DIPC is required to maintain a Special Education Team (SET) consisting of multidisciplinary staff trained in education, medical care, mental health, administration, social work, and physical education. At the time of the inspection, the facility had not yet formally established this team.

VIII. Previously Non-Compliant Standard

- **FRS 2.10 - Use of Physical Control Measures and Restraints.** During review of the February 10, 2026, immediate use-of-force incident, the compliance reviewer found that the audiovisual recording equipment retrieved from the Emergency Response Team locker was not functioning properly. Corrective action was required to ensure the equipment was consistently maintained in an operational condition.
- **During the April 14–16, 2026, inspection, the DIPC verified that the previously non-compliant item had been corrected and was compliant.** The Site Security Manager's Special Assistant tested the audiovisual equipment and confirmed that it was functioning properly.

IX. Conclusion:

The April 14–16, 2026, compliance inspection of the DIPC evaluated the facility's adherence to the 2020 FRS and applicable provisions of the FSA. Overall, the inspection found the facility to be operating in substantial compliance with applicable standards, with thirty-nine standards rated compliant, one standard rated compliant with issues, three standards deemed not applicable, and no standards rated non-compliant. Accordingly, an overall rating of **Compliant** is recommended.

EXHIBIT 4

DEPARTMENT OF HOMELAND SECURITY
NOTICE OF RIGHTS AND REQUEST FOR DISPOSITION

Alien's Name: _____ A-Number (if any): _____

YOUR RIGHTS

You have been arrested because Immigration Officers believe that you are illegally in the United States. When you are arrested in the United States you have certain rights. No one can take these rights away from you. This paper explains your rights.

You have the right to use the telephone.

You may call your mother or father or any other adult relative. You may call your adult friend. If you do not know how to use a telephone, the immigration agent will help you.

You have the right to be represented by a lawyer.

Attached to this paper is a list of lawyers who can talk to you, and help you, for free. A lawyer can fully explain all your rights to you, and can represent you at a hearing.

You have the right to a hearing before a judge.

The judge will decide whether you must leave or whether you may stay in the United States. If for any reason you do not want to go back to your country, or if you have any fears of returning, you should ask for a hearing before a judge. If you do not want to have a hearing before a judge, you may choose to go back to your country without a hearing.

Reading this Notice:

- ☐ I have read this notice.
- ☐ This notice has been read to me.

Right to Use Telephone:

- ☐ I have contacted my parent(s) or a legal guardian by telephone.
- ☐ I have contacted an adult friend or relative by telephone.
- ☐ I do not want to talk to anyone by telephone.

Right to be Represented by a Lawyer:

- ☐ I have spoken with a lawyer.
- ☐ I do not want to talk to speak with a lawyer.

Right to a Hearing:

- ☐ I understand my right to a hearing before a judge.

Completion of the following is optional:

The person contacted is (Relationship):

The person contacted is (Name):

- ☐ **I request a hearing before a judge.**

Signature: _____ Date: _____

- ☐ **I do not want a hearing before a judge.**

I am in the United States illegally and ask that I be allowed to return to my country, which is named below.

Country: _____

Signature: _____ Date: _____

INSTRUCTIONS TO OFFICERS

This advisal is required to be given to all persons who are taken into custody and who appear, are known, or claim to be under the age of eighteen. No such person can be offered or permitted to depart voluntarily from the United States except after having been given this notice.

The required procedure distinguishes between two classes of minors:

- 1) The first class are those minors apprehended in the immediate vicinity of the border and who permanently reside in Canada or Mexico. These persons shall be informed that they have a right to make a telephone call to any of the persons mentioned in the notice. The purpose of this call is so that they can seek advice as to whether they should voluntarily depart or whether they should request a deportation hearing. We are required to make a record of any refusal to accept our offer of a telephone call.
- 2) As to all other minors, **they must not only be given access to a telephone, they must establish communication, telephonic or otherwise, with one of the persons listed in the notice** before they can be offered voluntary departure.

The DHS retains the right to decide when to allow telephone calls. The only prohibition is that the minor cannot be asked to voluntarily depart until after telephone access is provided. If the minor is not offered voluntary departure but is put into deportation proceedings by issuance of a Notice to Appear, this procedure is not necessary. It is our duty to make reasonable efforts to contact the person of the minor's choice, but after unsuccessful efforts to reach that person, we can facilitate contact with another such person. Whenever the minor elects to pursue a process, such as a call to a foreign country, which is operationally unacceptable, we can always proceed to issue a Notice to Appear.

The minor must tell the type of person that he/she talked to but need not give us that person's name or identifying information. If a minor, **of his/her own volition**, asks to contact a consular officer, this will satisfy the requirements of the notice.

The officer need not read the notice to the minor unless the minor is under 14 years of age, or unable to understand the notice. The officer must ask the minor whether he/she wants to make a call, whether a communication was made and, if made, to whom. The officer must also verify whether the minor wants voluntary departure or a hearing, and must sign and date the form to show this was done.

Officers are not to offer any advice to any minor as to what he/she should or should not do.

TO BE COMPLETED BY THE OFFICER

I verify that: _____ A#: _____

1. a. ☐ The subject named was given this notice to read.
b. ☐ I read this notice to the named subject in the following language: _____
2. ☐ I asked this subject whether he/she wanted to make a telephone call, and offered assistance in the use of the telephone.
3. a. ☐ The subject told me that he/she did not want to make a telephone call, or
b. ☐ The subject told me that he/she established communication and the form was marked to indicate it;
c. ☐ The subject was unable to establish telephone communication with the desired individual.
The following number of attempts were made: _____
4. a. ☐ The subject requested a hearing.
b. ☐ The subject admitted deportability and requested to return to his/her country voluntarily, without a hearing.
5. a. ☐ A Notice to Appear was issued because, the subject was unable to establish contact with any of the individuals specified after making the number of attempts indicated above (Item 3c), and after assistance to establish contact was given or offered.

Guaifenesin 400mg, PO, TID, PRN for cough *5 days. F/U as needed.

No grievances or resident requests received for any of the noted concerns. Exhibit / ECF No.	Declarant	Date	Summary of Allegations	K.I.	Action Taken / Follow-Up
					See Incident # - 2026-0224-011-II previously provided. No force was utilized against the minor. General Response to Allegations of D.D. and C.V.L.¹ During the January-February protest-related activity, certain handwritten signs, drawings/artwork, and written communications associated with the protest were collected because they were considered protest-related materials not authorized under housing unit rules. Personal property was not confiscated or destroyed. No searches were conducted in relation to the March and April protests. Therefore, no handwritten signs, drawings or artwork, or written communications associated with the protests were collected during the March and April protest events. General Response to Allegations of Retaliation/Fear of S.O.² Resident concerns may be communicated through direct staff communication, town hall meetings, and/or the formal grievance process. Incidents are investigated by the respective Supervisor or Department Head of the area in which the incident occurred. Matters are addressed and resolved by the appropriate Supervisor or Department Head through the grievance procedure, informal resolution, or the 5-1 reporting system. General Response to Allegations of Lockdowns³

¹ This response applies to allegations throughout regarding destruction of drawings and Congressional visits.

² This response applies to generalized reports of fear of speaking out throughout.

³ This response applies to generalized reports regarding lockdown throughout.

No grievances or resident requests received for any of the noted concerns. Exhibit / ECF No.	Declarant	Date	Summary of Allegations	K.I.	Action Taken / Follow-Up
					During the January–February 2026 protest-related activity, no facility-wide lockdown was required, no systemic disruption of services was observed, grievance mechanisms remained available, and daily services continued uninterrupted.
Ex. 4 – ECF 1748-5	M.S.P.	3/12/26	Mother; surprise detention at “non-detained” appointment; 9-day hotel stay; food-related illness; minimal schooling/tech; lack of rights info.	Medical; Rights / Flores; Food; Sleep; School; Legal Access; Mental Health; Retaliation; Commissary; Uncertainty	A720 No grievances or resident requests received for any of the noted concerns. Responses to categorical conditions of confinement complaints such as food services, access to education services, sleeping conditions, lighting conditions, telephone access, pro bono lawyer access, housing separate from spouses, library/law library access, recreation access, noise in housing units, hygiene item access, bottle/formula access, and generalized medical/mental health services, etc. will be provided in the body of the JCSR. Medical Complaint Summary Date of encounter: March 2, 2026 – resident submitted a sick call and was seen for vomiting, diarrhea, headache. She was prescribed Tylenol, ibuprofen, Zofran, and Pedialyte. Provided education on limiting greasy foods and eating small meals. The resident was reminded to follow up with medical as needed. The resident did not return. She was released on April 16, 2026. Relevant U.M.N. On March 2, 2026, UM I.G. and RC K.A. conducted a wellness check with the resident. The resident reported experiencing intermittent stomach pain. She was advised to report to Medical should the pain worsen. She also stated that one of her children visited Medical over the weekend due to severe allergy symptoms.

No grievances or resident requests received for any of the noted concerns. Exhibit / ECF No.	Declarant	Date	Summary of Allegations	K.I.	Action Taken / Follow-Up
					On 3/10/2026, UM I.G. and RC A. met with the resident in the activity room. The resident reported she is doing well and has no medical concerns at this time. Regarding her children, she stated that her son, M., continues to experience allergies and is currently receiving medical treatment. Her daughter is doing well. On 3/25/2026, UM I.G. spoke with the resident, who reported that she is doing well. She stated that her children are also doing well and that there are no medical concerns at this time. At the time of contact, the resident did not express any questions or concerns. On 3/30/2026, UM I.G. and RC A. spoke with the resident, she reports that she is currently in good health, and that her children are also in good health with no medical issues at this time.
Ex. 5 – ECF 1748-6	M.M.-S.	1/15/26	~113 days detained; vegetarian daughter diet issues; UTI mismanaged; daughter fainting/arm injury; poor schooling; Flores release to stepfather denied.	Medical; Rights / Flores; Separation; Food; Water; Bathrooms; Sleep; School; Legal Access; Grievances; Mental Health; Voluntary Dep.; Commissary; Clothing; Isolation/Searches; Uncertainty	A748 No grievances or resident requests received for any of the noted concerns. No grievances or resident requests received for any of the noted concerns. Exhibit / ECF No.	Declarant	Date	Summary of Allegations	K.I.	Action Taken / Follow-Up
			email/phone limits; no rights presentation.	School; Legal Access; Mental Health; Retaliation; Commissary; Clothing; Uncertainty	Medical Complaint Summary Date of encounter: February 16, 2026, 0200 hours – resident was escorted to Main Medical for skin abrasions and Mental Health concerns. He received wound care treatment and was referred to Mental Health. He was housed in Medical Annex and was seen by Mental Health on February 17, 2026. He was prescribed triple antibiotics for wound care. Resident was released on February 18, 2026. Relevant U.M.N. Mother (A942) 10/15/25 - RC O. visited the resident for a wellness check. Child is eating daily and participating in activities. Resident declined medical services and reported no concerns. Rules and cleanliness standards were reinforced. No problems in suite or hallway. 10/20/25 – A wellness check was conducted with the resident. During the interaction, she reported that both she and her child are doing well, are eating properly, and have no complaints at this time. Clothing was also provided to the resident during this visit. 10/27/25 - Conducted suit inspections no contraband was found. Meals are regular. Children are active in school and recreation. No health issues. Medical care declined. Legal case still open. Living area fine. 11/04/25 - Spoke with the resident regarding her current well-being. She reported that both she and her child are doing well and are eating adequately. She is still awaiting a response regarding her case.

No grievances or resident requests received for any of the noted concerns. Exhibit / ECF No.	Declarant	Date	Summary of Allegations	K.I.	Action Taken / Follow-Up
					11/12/25 - RC O. performed a routine wellness check. Everything is in order; no problems to report. Clothing was issued appropriately. 11/24/25 - Checked in with resident today. No issues identified in the suite. Resident and child/children are eating satisfactorily. Gave reminder regarding PREA reporting procedures. 12/05/25 - RC O. visited the resident for a wellness check. Child is eating daily and participating in activities. Resident declined medical services and reported no concerns. Rules and cleanliness standards were reinforced. No problems in suite or hallway. Conducted 60-90 assessments. 12/15/25 - RC O. visited the resident for a wellness check. Child is eating daily and participating in activities. Resident declined medical services and reported no concerns. Rules and cleanliness standards were reinforced. No problems in suite or hallway. 12/26/25 - RC O. conducted a wellness assessment of the resident and her child. The family appears to be eating well, and there were no medical needs reported or observed. Room cleaning expectations, including daily bed-making, were reviewed with the resident. 01/07/26- RC O. completed a wellness check. Resident and child/children reported eating well and had no medical needs. I reminded them about keeping the room clean and making beds. Shoes were provided size 10. 01/20/26 - RC O. conducted a wellness check on 1/20/26. Resident reported her child is eating daily and participating in recreational activities. No health concerns were noted, and medical services were declined. She was reminded of facility rules and reoriented on room cleanliness. No issues in suite or hallway.

No grievances or resident requests received for any of the noted concerns. Exhibit / ECF No.	Declarant	Date	Summary of Allegations	K.I.	Action Taken / Follow-Up
					02/06/26 – I, RC L. conducted a wellness check on the residents in their room. The residents reported that they are doing well and stated they are eating and sleeping adequately. Resident mentioned that she has started experiencing headaches. I recommended that she report to Medical for evaluation. I reminded all residents that their room must remain clean at all times for the safety and health of the children. I asked if they had any questions, concerns, or needs, and they reported none at this time.
Ex. 7 – ECF 1748-8	N.P.V.	3/11/26	Connecticut stop; ankle monitor; family detention; anxiety in teen son; sleep/water issues; lockdowns during protests; Flores confusion.	Medical; Rights / Flores; Separation; Food; Water; Sleep; Legal Access; Mental Health; Retaliation; Voluntary Dep.; CBP Icebox; Commissary; Uncertainty	A311 Medical Complaint Summary Date of encounter: February 11, 2026, and February 16, 2026 – resident was seen for dental pain and referred to the onsite dental department for evaluation and treatment. Ibuprofen 800 mg, PO, TID/PRN for pain was ordered. Plan for treatment following dental visit. No grievances or resident requests received for any of the noted concerns. Medical Complaint Summary A317 Encounter with psychologist on 4/2/2026. The minor is experiencing situational sadness and emotional distress related to separation from school, friends, and recently released peers within the facility. Despite these stressors, he continues to demonstrate logical and goal-directed thinking, appropriate social engagement, and stable behavior. NO diagnosis of anxiety.

No grievances or resident requests received for any of the noted concerns. Exhibit / ECF No.	Declarant	Date	Summary of Allegations	K.I.	Action Taken / Follow-Up
					Relevant U.M.N. 01/27/26 - Resident Counselor C.C. met with the resident, who reported she is doing well. She shared that she spends her time in the activity room, visiting the library, and spending time in the gym, and she received mental health and medical support and also her kids are going to education classes every day. About her case, she signed for voluntary departure and she is waiting to return soon to her country. 02/02/26 - On February 02, 2026, RC J.V. made contact with resident. Resident hasn't heard anything from ICE. Resident sent messages through tablet and has attended meetings on Thursdays in Chapel. No issues in the hallway nor in their room. Family is eating and sleeping okay. Resident did not have any questions for me at the moment. 02/11/26 - R.C.C. made contact with the resident in her suite. The resident reported that she and her children are doing well. She stated that they are sleeping and eating adequately. The family is receiving mental health support once a week. The resident also shared that her children recently received several vaccines. Regarding her immigration case, the resident indicated that ICE is currently verifying her antecedents. She also reported that her children have a court appointment scheduled for February 17, 2026. No questions at this time. 2/17/2026 - UM. I.G. made contact with the resident. She express feeling regular with no medical concerns at this time, her kids are doing good. Resident mentions she have her court today and they are going to join her case with her kids, also she stated her next court is on Feb 24,2026. She asked how she can receive money through western union I explained her step by step how the family or friend can send her money.

No grievances or resident requests received for any of the noted concerns. Exhibit / ECF No.	Declarant	Date	Summary of Allegations	K.I.	Action Taken / Follow-Up
					02/23/2026 - UM I.G. and RC K.A. met with the resident. She stated that she and her children are doing well and have no medical issues at this time. She reported that she has court scheduled for 02/24/2026 and is hopeful she will receive an update regarding her case. 03/04/2026 - I, RC K.A. on 3/4/2026, conducted weekly contact with resident. Resident states they are in good health and eating constantly. Does not need to utilize medical services at this time but understands how to get there if needed. There are no current issues at this time. 03-09-26 - I, RC K.A. on 3/9/2026, conducted weekly contact with resident. Resident states they are in good health and eating constantly. Does not need to utilize medical services at this time but understands how to get there if needed. There are no current issues at this time. 03/16/2026 - On March 16, 2026, RC J.V. and UM I.G. made contact with resident. Family is eating and sleeping well. Kids are attending education program. No problems in room or hallway. Resident was granted a free phone call with lawyer C.M. (929) [REDACTED] 567 in New York. Resident had no other issues at this time. 03-23-26 - RC J.V. made contact with resident. Kids are eating and sleeping well. Kids are also attending education program. Resident had appointment today and was told her court appointment on 4/2/2026 was cancelled. No problems in the room or hallway. CoreCivic defers to ICE regarding allegations of separation from baby prior to arrival at the facility. Medical Complaint Summary March 16, 2026 – resident was seen by a medical provider for follow-up regarding abdominal pain and a history of gallstones. An abdominal ultrasound referral was placed. The resident was released on March 20, 2026. Relevant U.M.N. 11/05/25- R.C. S.V. provided with clothes to resident, she shared that she and her child/children are well, with no issues in her suite nor with other resident in the facility. Resident has not hear any dates on her released and attending legal appointments as needed. Resident has been sending her daughter to participate on the school program, she also goes to library and recreational services to spend time and have fun. Resident has been shown publications with numbers to call to report any PREA situation. Resident had no needs nor other questions at the time of the meet. 11/19/25 - R.S.V. met with resident and child for a wellness visit. Resident stated that they are well, with no issues in her suite nor in the facility at this time. Resident was reminded to fill out clothe form if clothing exchanges are needed, to also be at chapel 1 on Mondays if any questions for ICE on regards of her legal case. Resident also was reminded to use medical services as needed. No other topics were spoken during the visit. Resident requested and received 3 pants size S.

					12/02/25 - R.C. S.V. met with resident in her suite;. Resident shared that is waiting for her case to move forward, and waiting for her results on her interview or to be released with a bond. Resident said that her child/children and herself are attending medical services as needed and they all go to dining on a regular basis. Resident was reminded to cover a bit more since the weather is getting colder, to avoid getting a cold. She was reminded that her child/children can be attending the school program but it is voluntary to attend. Resident also shared that she has been using library services to communicate with her family and using the phone services with no issues. No other topics were discussed during the visit. 1/8/26 - Resident Counselor C.C. met with the resident, who reported she is doing well. She shared that she spends her time in the activity room, visiting the library, and spending time in the gym, and she received mental health support and also her kid is not assisting to education classes. About her case, she has a positive in her case is waiting for court on January 09, 2026. 03/11/26 - RC L. spoke with the resident and her child. I asked the resident and the child how they were feeling, and both reported that they were fine with no medical conditions to report. I asked the resident if she had any updates regarding her immigration process, and she stated that she is supposed to leave soon and remain in the United States. The resident reported having no further questions or concerns at this time.
Ex. 14 – ECF 1748- 15	S.K.	3/12/26	22-year-old with three toddlers; unresolved tooth infection in 2-year-old; threats after talking to Rep. C.; water, formula, food and milk restrictions; sleep, interpreter issues.	Medical; Rights / Flores; Separation; Food; Water; Bathrooms; Sleep; Legal Access; Grievances; Mental Health; Retaliation; Voluntary Dep.; Commissary; Clothing; Force/Threats; Isolation/Searches; Uncertainty	A493 No grievances or resident requests received for any of the noted concerns. Medical Complaint Summary There is no documentation to support that the child’s condition went untreated for an extended period. Children are immediately evaluated by clinical staff, and appropriate assessments and all interventions are initiated based on presenting symptoms. In this case, the child had a reported history requiring cardiology clearance prior to undergoing dental procedures, as well as a referral to pediatric dentistry due to the potential need for sedation. These precautions are standard clinical practices to ensure patient safety before proceeding with invasive dental

					treatment. The record indicates that the child was monitored, and referrals were placed in a timely manner. When the condition progressed to an abscess requiring a higher level of care, the child was appropriately referred to the emergency room for further evaluation and treatment. There is no evidence to indicate neglect or failure to provide care; rather, the documentation reflects that care was delivered in accordance with clinical guidelines, with appropriate consideration for the child's medical complexity and safety. On March 16, 2026, the mother, A493 was seen by a medical provider for follow-up regarding a missed menstrual cycle. Education was provided regarding possible causes of missed periods, including PCOS and increased stress. HCG testing performed on March 15, 2026, was negative. Relevant U.M.N. Date/Time:03/02/2026 17:25 Contacted resident, there was a miscommunication about giving her two oldest children baby formula. Turns out she is only giving her youngest formula but her two older kids, regular milk. I did have to remind her that if she has to step out of her room, she needs to let the officers in the hallway know so they can keep an eye on her kids. She is not to have other residents watch her children for her. I also had to remind her about keeping all the lights on in the room during the day. I did tell her I understood that her children needed to nap, so I allowed her to turn them off until her kids had fallen asleep, then she must turn them on. ██████ interpreter 1207241

Detainee alleges she was falsely accused of hitting staff. Information noted below regarding the associated grievance and response. Grievance & Request -

Grievance #636590641 - They are falsely accusing me of assaulting an officer when there is no evidence, only the testimony of her own colleagues who claim not to have seen anything, only an alleged noise, but they do not claim not to have witnessed an assault. However, two guards and witnesses who were next to me and facing me at the time claim not to have seen any assault. They want to force me to sign a document, making me responsible for something I did not do. They were manipulating me, saying that if I don't sign, they will fabricate charges against me and arrest me. I request that you review the attached supplement in the complaint boxes and state that I am sending it in writing. Thank you. I await your cooperation and assistance. Responses. I remain attentive

Response - Thank you for submitting your written complaint. This response confirms receipt of your statement regarding the incident in which you report being falsely accused of assaulting an officer, pressured to sign documents you believe to be inaccurate, and threatened with fabricated charges if you refused to sign. You also indicate that witnesses present during the alleged incident reported observing no assault, and you express concern about staff conduct, the alleged coercion, and the potential impact on your immigration case. Your complaint and all supporting documentation have been forwarded to the appropriate department for review in accordance with facility policy. An investigation has been initiated to evaluate: the circumstances surrounding the alleged incident; statements from all identified staff and witnesses; any available video, reports, or documents related to the event; and your allegation of coercion and intimidation by staff. At this time, your request to have the disciplinary charges dropped will be evaluated as part of the investigation process. Any determination will be based on the results of the investigation, in accordance with facility procedures and policies. Your request for an investigation into staff conduct has been recorded and forwarded to the appropriate supervisory staff for necessary action. Regarding your concern about the potential impact of this matter on your immigration case: the facility cannot make determinations or provide guarantees regarding the outcome of external immigration proceedings. However, you will receive all required documentation related to this complaint and any resulting findings, which you may share with your legal representative if you deem it necessary. You will receive written notification once the investigation has concluded and a final determination has been made. Please allow for the standard processing time established by the facility's complaint procedures.

Outcome: Incident referred to DPD for investigation of staff assault. DPD cited the resident a Class C citation for Simple Assault and referred the matter to the municipal court for further hearing.

Medical Request and Response regarding Fainting Allegation:

Request #638204661 - My 14-year-old daughter, M., fainted yesterday, December 22, 2025, outside the bathroom at night, and again today, December 23, 2025, around noon in the cafeteria. She is not eating and is depressed due to being separated from her siblings and the 50 days we have already spent here at this center. I hold ICE responsible for her physical well-being and demand specialized medical attention... The witnesses I have are the cameras and the moms here in the center where I am at café 1 Specialized medical care

Response - I spoke to the medical team and they confirmed your daughter was seen by a doctor on December 23, 2005. They will be contacting you for a wellness check. We will also be referring you to Mental Health to evaluate your daughter.

Library Access Grievance and Response:

Grievance #644998511 - I am writing to formally complain that the library has taken away our access to the state-run internet. We cannot access YouTube, Gmail, or Google. Furthermore, the staff there are very rude when answering calls, and there is no printing service available.

Response - The internet access currently provided at the library is consistent with the Family Residential Standards (FRS) and applicable contractual requirements. Specifically, FRS 5.1 – Correspondence and Other Mail states that centers will provide access to an internet connection that residents may use to send and receive email, use instant messaging, and send and receive PDFs and/or other scanned documents electronically. The standard also allows centers to implement filters to block inappropriate or non-approved websites. Accordingly, access to certain platforms (such as YouTube and unrestricted Google services) is limited in compliance with these requirements. Gmail is still available at this time for all residents to use, as we work to get ProtonMail to work. Additionally, printing services are available and operational at this time. Regarding the concern about staff conduct, additional information is needed in order to investigate and address the allegation. Please provide the staff member's name (if known), a physical description if the name is unknown, and the specific

date(s) and time(s) of the incident(s) in question.
Once this information is received, the matter can be reviewed and addressed appropriately.

Additional Information Regarding Computer Access:

Library aids test internet access daily and report any issues to the AFA at 11 a.m. so that IT can address any issues. If a resident's Gmail account requires phone code authentication, the resident may request access to their phone to turn off the phone code authentication setting.

Response to Santa Claus Complaint⁴:

A CoreCivic facility employee dressed as Santa to provide holiday cheer to the residents. Photos were taken and Santa handed out snacks. Santa did not hand out presents to the children so as not to cause feelings of favoritism or inequity. Children were not permitted to physically engage with Santa in order to guard against allegations of inappropriate physical contact.

Case Notes address allegations of separation from or restriction on contact with family members detained at other facilities.

Medical Complaint Summary

Issue/History: Fainting spell related to sad news; acute MH referral

Date(s): 1/17/2026

Provider T.: Nursing; Mental Health

Intervention/Outcome: Medical emergency for fainting; evaluated by nursing and referred to MH. MH visit completed same day.

Issue Category: Mental health / acute event

⁴ This response applies to all reports regarding Santa.

Disposition: Same-day MH referral

Date of encounter: 1/17/2026

Reason for visit: MH follow up

Tx: Resident declined to continue with MH services at this time.

Date of encounter: 1/17/2026

Reason for visit: sick call/dizziness

Tx: referral to MH

Relevant U.M.N.

11/10/25 - UM I.G. spoke with the resident, she mentions she is doing well, but worried about her other daughter who is being held in another facility. Resident is waiting on her asylum interview. She also mentions both of her kids are going to the school. Resident request assistance using the tablet and for information on how she can make a phone call with her daughter who is detained in another facility, I assist the resident and explain the process to conduct the phone call.

11/12/25 - UM I.G. conducted a 15 minutes facility-to-facility phone with her daughter Z.D.B.-O. who is detained in E.P.P.C..

11/19/25 - Resident was met and reported she is doing well. She shared that she spends her time in the activity room, visiting the library, and using the gym. She has received mental health support. Her children attend education classes daily and have also received dental services.

11/28/25 - R.C. J.V. conducted a facility-to-facility phone with her daughter Z.D.B.-O. who is detained in E.P.P.C..

12/17/25 - Contact was made and Resident was given a facility to facility phone call From STIPC to speak with her son and daughter.

12/29/25 - Contact was made and was given a phone call to speak with her daughter at the E.P.F.

					01/07/26 - Resident was granted a facility to facility phone call to speak with her son, resident states everything is fine. 01/15/26 - Contact was made and states everything is fine and requesting a phone call with her daughter who is currently at another facility. Request was made pending approval.

Grievances: Grievance #628486911 - My court 18th December, I can't prepare because with no internet it is impassable. Response – There is an ongoing network issue. We are currently working with our IT department to resolve it as quickly as possible. We apologize for the inconvenience. Grievance #629272171 – My court 18th December, I can't prepare because with no internet it is impassable.

Response - The recent internet outage was company-wide, and unfortunately, there was nothing we could do onsite to resolve it. Employee PCs use a separate network from resident PCs, which is why they were not affected. The service has now been restored, and we apologize for the inconvenience. The internet provider, together with CoreCivic, worked diligently over the past several days to address the issue, as we understand the importance of internet access for residents.

Medical Complaint Summary

The resident's medical file was reviewed. The resident's date of birth is [REDACTED].

There were no medical reports in the file indicating that the 2-year-old female resident (A829) was treated for or associated with a vomiting outbreak. The resident was prescribed antibiotic treatment and children's Advil. These medications were administered during the evening pill line, which operates from 1900 to 2100 hours.

Due to our open movement policy, residents present for medications during designated time windows rather than all at once, making extended wait times uncommon.

Mealtimes for residents have not changed and are as follows:

- 0600–0800 hours
- 1100–1300 hours
- 1600–1800 hours

No additional medical issues or concerns were reported to the medical department.

The resident was released from the D.I.P.C. on January 18, 2026.

Relevant U.M.N.

10/03/25 - RC E.G. made contact with resident during a suite inspection. Resident stated he was fine and didn't need anything.

10/17/25 - RC C. made contact with resident during a hallway walk through. Resident stated that everything was good, and that he did not have any issues or problems to report.

					11/24/25 - RC C. made contact with resident during a fire and safety walk through. Resident was asked if everything was going ok. He stated that everything was all good. He had no further issues or problems to report. 01/13/26 - RC T.R. made contact with resident. He was heading to dining and he was walking with his wife. He said all was ok.
Ex. 25 – ECF 1748- 26	A.M.-P.	2/12/26	>125 days detained; CBP iceboxes; father separated; 2-year-old chronically ill; diaper issues; low-value schooling; Flores flyers removed; crayons and OTC meds confiscated after protest. U.M.N. do not indicate complaints regarding chronic illness.

10/10/25 - R.C. J.V. conducted orientation / acculturation and child assessment on family. PREA full explanation was provided for her to report any sexual assault or abuse. Resident was explained all the topics on form 17-100G. Resident does not have any questions at this time. I reminded her if she does have to ask any staff member when available. Resident was informed that she can communicate via tablet with ICE on any questions.

10/15/25 - Made contact with the family. Resident stated that there are no issues in the room and that her family is eating and sleeping well. The resident was reminded that the room must remain clean.

10/29/25 - Contact was made with resident, winter jackets were given to them and to family.

11/14/25 - Made contact with resident, she was wanting to move rooms. She made the mistake of lending some lotion to someone from her room, but the other person continued to get lotion without her permission. Luckily we did not have to speak to the other person because they were moved to another room for another reason.

11/21/25 - Made contact with resident, she was advised when throwing diapers in the trash, they can be throwing them in the trash bins outside her hallway. All items that belong to her must be stored in their drawers. It was also mentioned that when getting snacks from the kitchen in the hallway, to please not take in large amounts. Only take what will be consumed at the moment.

12/10/25 - Made contact with resident, she was needing some help with finding out about some of her transactions. She was helped and issues were resolved.

12/17/25 - Made contact with resident, she mentions that everything is going good and there are no issues to report at the moment.

01/07/26 - Made contact with resident. Resident stated there are no issues in the room. Family is eating and sleeping well. Family was reminded that the room must remain clean. Resident was reminded of the importance of following the rules and respecting each other. She did not have any questions at the moment.

					01/04/26 - Made contact with resident. She mentions that everything is fine. She did ask how to submit and ICE request through physical form. We told her the form can be put into the mail box labeled "ICE" at the end of the hallway. 02/07/26 - Made contact with resident. Resident stated there are no issues in the room. Family is eating and sleeping good. The resident was reminded that in regards her case, they need to be patient, and also they cannot enter rooms that are not assigned to them. No questions at the moment.

RS B. had already explained the new process to him and has been reporting to activity room.

A187**Request & Grievances –**

Request #644706101 - My daughter has been diagnosed with Hysprung's disease and her health is severely deteriorated. On December 12th, after numerous crises, she received emergency medical attention at a nearby hospital. However, her detention and her current circumstances have worsened her condition, and she is now at risk of death. I have taken her to the doctor, but she is not receiving the necessary care. They refuse to help her in any way possible, and we have received poor treatment from the staff. They also claim that the pediatrician is on vacation and that there are only nurses available who lack the authority and knowledge to take necessary measures such as hospitalization or emergency care. Given this center's refusal and inability to provide her with adequate care, I request that she be transferred to a hospital as soon as possible.

Response - Good morning, Please submit a sick call request so Pediatric Provider R. can evaluate resident. Thank you .

Grievance #647133191 - On Monday the 12th, I submitted a request because my daughter has been denied specialized medical attention, with the explanation that the pediatrician is on vacation. On Tuesday the 13th, they replied that I should submit a skill call, which I did in person. She was assigned a consultation with a nurse who did absolutely nothing. The nurse said she couldn't do anything because she was just a nurse, but that she would schedule an appointment with a doctor. The next day, the doctor saw her, but she also knew nothing about her diagnosis. She was even searching online on her computer for what it meant to have Hyspurn disease (my daughter's diagnosis). However, she only ordered an X-ray of her stomach and intestines, saying that once she had the results, she would schedule another appointment. After my repeated requests, the X-ray was finally taken on Saturday the 17th. The X-ray clearly shows her poor condition and the severe constipation she is currently experiencing. She has been unable to have a bowel movement for 38 days. Forcing her to defecate is an abuse, a medical negligence that they are committing against my 10-year-old daughter. They have violated all her rights in every possible way. I demand immediate medical attention. Now, I have also been sick; I contracted the flu virus and a throat infection. Last night, Sunday the 18th, they isolated me and said that a doctor would see me first thing this morning. It is almost 2 pm and I have not received any attention.

D.R.R.
(Hirschsprung)

1/15/26

Parent of 10-year-old with Hirschsprung's disease; pediatrician says child should not be detained; 34 days without bowel movement; fever; laxative reliance; bathroom access concerns.

Medical; Food;
Bathrooms; Sleep;
Disabilities;
Uncertainty

Response - resident was evaluated by Np on site. Released

Medical Complaint Summary

The resident's medical file was reviewed. The resident's date of birth is [REDACTED]

The 11-year-old female resident (A188) was evaluated by the medical department and diagnosed with Hirschsprung's disease.

Throughout the resident's stay, medical care was provided in response to reported symptoms, with ongoing management of chronic constipation related to Hirschsprung Disease. Interventions included pharmacologic treatment, dietary modifications, diagnostic imaging, and hospital referral when clinically indicated. Periods of non-compliance with prescribed treatment were noted due to caregiver refusal of medications.

The resident arrived at DIPC on 10/24/2025 and was released on 01/19/2026. Upon intake, no medical issues were identified. The detainee's parent responded "No" to all initial screening questions, including those regarding special healthcare needs, current medical complaints, ongoing physician care, and any recent hospitalizations or surgical procedures. The resident did not have any medications in their possession at the time of arrival to facility. Additionally, no urgent mental health concerns were identified during intake screening.

On the same day of arrival, the resident underwent an Initial Health Appraisal conducted by a medical provider. During this evaluation, the resident's mother reported a history of occasional constipation. She indicated that the resident had been using MiraLAX for symptom relief, though enemas were sometimes required. The parent further reported that the resident had not had a bowel movement for three days prior to admission. Following assessment, the provider issued an order for P.G.O.P. to be administered twice daily for 30 days on an as-needed basis to address constipation.

During the detainee's stay at the facility, multiple Sick Call requests were submitted and addressed as follows:

On 11/09/2025, the resident presented with complaints of headache and nausea. The medical provider prescribed Acetaminophen as needed for headache

management. The resident had a recorded fever of 101.7°F.T. mother reported that nausea began two days prior and was typically occurring after meals.

On 11/10/2025, the resident was seen for follow-up. The mother reported that the child is sensitive to various foods and experienced one episode of vomiting following lunch the previous day. No additional vomiting episodes were reported. The mother also stated that the fever noted the previous evening had resolved. The resident's last bowel movement was reported as one day prior. The mother indicated the child had been eating well and maintaining adequate hydration.

On 11/14/2025, the resident was evaluated by the on-site pediatrician. The pediatrician documented a history of Hirschsprung Disease that had not been surgically corrected, resulting in chronic constipation. The resident had been using MiraLAX, producing normal stool consistency but with bowel movements occurring approximately every four days. A new treatment plan was initiated, including Dulcolax 10 mg rectal suppository daily as needed for constipation, along with a "No Fried Foods" special diet. A follow-up appointment was scheduled for one week, with instructions to return sooner if symptoms worsened or persisted.

On 11/16/2025, the resident was seen during Sick Call, with the mother requesting a special diet for the child.

On 11/17/2025, the resident was evaluated by a pediatric nurse practitioner. The provider educated the mother on appropriate high-fiber food options and the importance of adequate fluid intake. The mother indicated familiarity with the child's dietary needs but requested increased variety in menu options. She was instructed to continue adherence to the prescribed medication regimen.

On 12/10/2025, the resident returned to Sick Call with complaints of not having a bowel movement for 17 days despite daily use of MiraLAX and suppositories. The mother requested evaluation by the pediatrician.

On 12/11/2025, the pediatrician evaluated the resident and ordered administration of a Fleet enema, with a repeat enema the following day if needed. Orders were also given to continue oral fiber supplementation and to obtain an abdominal and pelvic x-ray the following morning to rule out fecal impaction.

On 12/12/2025, the resident was seen for follow-up. The mother reported that the child had been without the prescribed oral fiber powder for approximately two weeks and had not had a bowel movement during that time. Imaging results revealed a large amount of impacted stool. The resident was referred to F.R.H. for further management and was transported at approximately 4:00 PM. The resident returned to the facility the same evening after receiving an enema and successfully producing a bowel movement.

On 12/13/2025, the resident was evaluated for post-hospital follow-up. The child was determined to be stable and was returned to the general population. No new medical orders were issued, and a follow-up appointment with the pediatrician was scheduled in two days.

On 12/15/2025, the resident was seen by the pediatrician. The child had not had a bowel movement for two days but was stable and without discomfort. Orders were given to initiate MiraLAX oral powder twice daily and continue Dulcolax suppositories as needed. Instructions were provided to return to the clinic if no bowel movement occurred within 4–5 days. The resident was also advised to maintain a high-fiber diet and adequate fluid intake. No additional concerns were reported.

From 12/17/2025 through 01/15/2026, the mother refused administration of medications for the resident.

On 01/16/2026, the resident was evaluated by a medical provider. The mother requested an enema and an abdominal/pelvic x-ray. Imaging was ordered.

On 01/17/2026, the x-ray results indicated accumulation of stool without evidence of obstruction. The mother agreed to resume administration of the prescribed oral fiber medication.

On 01/18/2026, medications were again refused.

On 01/19/2026, the resident was released from the facility.

Ex. 29 – ECF 1748- 30	D.R.R. (2nd)	(Follow- up)	Follow-on details concerning Hirschsprung's management and medical interactions (partial OCR).	Medical; Food; Bathrooms; Sleep; Disabilities; Uncertainty	A187 See above response.
Ex. 30 – ECF 1748- 31	L.T.P.B.	1/14/26	Autistic mother with two autistic sons; checkpoint arrest; long detention; autism meds changed to generic anti-anxiety; hives; unsanitary bathrooms; reluctance to report.	Medical; Rights / Flores; Separation; Food; Water; Bathrooms; Sleep; Legal Access; Grievances; Mental Health; Disabilities; Uncertainty	A628 No grievances or resident requests received for any of the noted concerns. Medical Complaint Summary Date of encounter: January 28, 2026 – Mental Health referred resident to Dr. T., Psychiatrist, and he was seen the same day. The resident was prescribed: Hydroxyzine, Adderall and Seroquel. The resident refused to take Seroquel. Resident was transferred to Laredo shelter on February 7, 2026. There is no evidence to support that staff refused to provide prescribed medications to either the mother or the child during the reported episode of hives. Additionally, the medical team maintained ongoing assessment of both patients' conditions, including consideration of the child's autism diagnosis to ensure appropriate, individualized care.
Ex. 31 – ECF 1748- 32	M.S.M.	1/15/26	Mother with 5- and 10-year-olds; Nogales iceboxes; promised ankle-monitor release then detained; food, widespread illness; limited schooling; harsh soap; Gmail blocked; lockdowns; lights/bedding issues.	Medical; Rights / Flores; Separation; Food; Water; Bathrooms; Sleep; School; Legal Access; Grievances; Mental Health; Retaliation; CBP Icebox; Commissary; Clothing; Isolation/Searches; Uncertainty	A680 No grievances or resident requests received for any of the noted concerns. Generalized Medical Complaint Summary Date of encounter: December 18, 2025 – resident was seen at sick call for headache. The headache was evaluated by nursing, and treatment was initiated. The resident received education on the importance of staying hydrated and avoiding outside activities when pollen counts are high. Tylenol 325 mg, two tablets, PO, TID/PRN, and Z.A. 10 mg, one tablet daily PRN, were ordered. On January 14, 2026, the resident went to medical to have her glasses fixed. The resident was transferred to Laredo on January 17, 2026. Relevant U.M.N. On 02/05/26 Resident and her sons were visited by R.C. S.V.. They have no questions on services and were provided with a sweater, shirts and shoes as they requested them. They are not expecting their release to happen soon since they feel that they have to work on some steps in her cases. They said that they have

					no issues with other residents, officers, or services. She was reminded how to meet with ICE for questions on her case and how to communicate when needed. On 01/26/2026 RC. S.V. met with the resident and her child/children for a wellness check. The resident is waiting for her case to move forward; she has been communicating with her relatives and sponsors without any issues with the telephonic/tablet system services. The resident has no issues in her suite and has no questions/needs at this time. On 11/19/2025 Resident was visited and assisted with some issues with her reading glasses; resident also received clothes for her sons. The resident stated that she goes to medical services in a frequent manner to receive medications. Her sons go to recreational services and participate in the outside daily activities that the recreational department offers to them. Resident has been participating in the cleaning of their suite and keeps her sleeping area picked up. No other needs were mentioned, nor were any issues brought to my attention. On 11/05/2025 R.C. S.V. met with resident to issue clothes that she had requested since theirs got damaged. Resident said that her and her children are well, they are participating in the various programs that the facility offers, they go to recreational services in a frequent manner to spend time with other residents. She has been waiting for the case to move forward and waiting for legal appointments. Resident was explained the use of the water purifier system installed in her suites' faucet, she was shown how to take advantage of the system and how to take care of it. She had no other questions nor other needs at the time of visit.
Ex. 32 – ECF 1748- 33	N.S.-R.	3/12/26	Mother of 5-year-old with developmental delays; ICE check-in detention; English-only 21-day form refused; severe constipation; poor food/water; need for special care; commissary spending.	Medical; Rights / Flores; Separation; Food; Water; Sleep; Legal Access; CBP Icebox; Disabilities; Commissary; Uncertainty	A452 No grievances or resident requests received for any of the noted concerns. **Note, Paragraph 9 of the declaration only states when the child is constipated, he gets a special diet and fruit; thus, indicating medical needs addressed. Medical Complaint Summary

					Issue/History: Headache voiced during health appraisal Date(s): 3/6/2026 Provider T.: Medical Provider Intervention/Outcome: Reported headache during health appraisal; treatment initiated by provider. Issue Category: Routine acute Disposition: Provider treatment Date of encounter: 3/6/2026 Reason for visit: provider visit/physical/headache Tx: follow up in medical PRN Medication ordered: T.E.S. 500 MG Oral Tablet; TAKE 2 TABLET 3 TIMES DAILY PRN Relevant U.M.N. 03-14-26 - Made contact with resident. Resident stated there are no issues in the room. Family is eating and sleeping good. The resident was reminded that in regards her case, they need to be patient, and also they cannot enter rooms that are not assigned to them. No questions at the moment.
Ex. 33 – ECF 1748- 34	C.R.B. (10- day)	10/12/2 6	Recently detained 16-year-old; crowded room; dirty bathrooms; limited clothing; education far below grade level; brief mental-health visits; missed tennis and friends; no rights training. EXHIBIT 7

April 15, 2026, Case Reviews

Overview

The following information summarizes the reported medical and dental concerns for several residents and family members, along with the documented care, treatment, and pending referrals or follow-up needs. The information below reflects the details provided for review and is organized by case for ease of reference.

The table below summarizes each case, the reported concern, documented recent care, and the status or pending need.

Resident / Family Member	ID / MRN	Reported Concern	Documented Recent Care	Current Status / Pending Need
1. E.G. family – child	Not provided	One of the five-year-old children in the family has significant dental decay, with numerous cavities requiring fillings.	The child was referred for offsite dental treatment requiring anesthesia. The case is noted as Dental Procedure Offsite - April 16, 2026.	Offsite dental care is pending or has been arranged, with anesthesia-based treatment identified as necessary.
2. H	Not provided	Reportedly needs an ultrasound and continues to have ongoing health concerns requiring follow-up.	Recent encounters include sick call on April 10, 2026, sick call on April 14, 2026, and an MD visit on April 15, 2026, which resulted in a cardiology referral.	Case reflects ongoing symptomatic evaluation with pending specialty or offsite follow-up, including ultrasound and cardiology review.
3. H.S.	A452	Reportedly needs dental care.	Recent charted encounters include a wellness check on April 2, 2026, during which no concerns were reported, and a sick call on April 13, 2026, for dandruff and skin complaints, for which treatment was provided.	Dental need remains outstanding based on the current record.
4. M.Sa's child / M.X.M.S.	A721	Reportedly needs medical attention for the arm due to a partial dislocation of the shoulder.	Intake record dated February 21, 2026 documents asthma with no orthopedic history noted at that time. Since intake, the child has had several sick-call visits for skin issues, allergies, and GI complaints, all treated with medication as appropriate.	The reported shoulder or arm issue is not reflected in the provided intake history and likely requires focused orthopedic evaluation or follow-up.

Resident / Family Member	ID / MRN	Reported Concern	Documented Recent Care	Current Status / Pending Need
5. C.C.	A764	Reported to have anemia, dizziness, vomiting at night, and difficulty sleeping, with concern that medication had not been provided.	A provider visit on April 10, 2026 documented treatment and medication orders. She is noted to have iron-deficiency anemia and is being treated with supplemental iron. Hemoglobin and hematocrit were recorded as 9.3 / 32.6.	Treatment has begun, but the reported ongoing symptoms suggest continued monitoring may be warranted.
6. J.S. family / G.K.	J.S: A957; G.K.A958	Family reported that the mother was housed in the medical unit and was not feeling well; she was described as having diabetes and arthritis.	G. K. is currently housed in the Medical Annex. Documented diagnoses include rheumatoid arthritis and type 2 diabetes mellitus. Treatment and medication have been provided for both conditions, and a rheumatology consult has been ordered.	Case appears to be actively managed, with treatment ongoing and rheumatology follow-up pending.
7. L.D.	A880	Reportedly has a painful tooth, believed to be a broken molar, and states that he did not receive dental care.	Record notes he is now inactive. From March 25, 2026 until his release on April 15, 2026, he did not disclose dental pain. During that period he was seen for impacted cerumen and leg pain, including an April 11, 2026 sick call for leg pain with treatment and medication provided.	Charted history does not document a dental complaint during detention despite the reported concern; resident is now inactive or released.
8. J.C.B.	A255	Reported to be in extreme pain and barely able to walk, with prior need for foot and ankle surgery and concern that lack of surgery could risk loss of the foot. It was also reported that he needed a boot and crutches and had not been allowed access to them.	Record shows a sick call on April 7, 2026 for leg pain with treatment provided, a provider consult on April 10, 2026 with diagnostics ordered and treatment provided, and a provider consult on April 13, 2026 resulting in a bottom-bunk request communicated to security. Chart also notes a motorcycle accident five years ago with chronic right leg pain; x-rays were ordered.	Case reflects chronic pain with mobility limitations, ongoing diagnostic workup, and housing accommodation. Record also states he reports pain but does not want to take the currently prescribed ibuprofen and Tylenol.

Resident / Family Member	ID / MRN	Reported Concern	Documented Recent Care	Current Status / Pending Need
9. J.G.E's child	A674	Father reportedly stated that his six-year-old child had eaten only mayonnaise and bread for approximately 14 days, raising concerns about both physical and mental health.	Record states there has been no change in weight and no sick call for decreased appetite concerns. It does note a sick call on March 29, 2026 for behavior issues, with referral to mental health.	Family concern remains significant from their perspective, though the chart does not document weight loss or an appetite-related medical decline.
10. E.V.de V.	Not provided	Age 62; reportedly has cholesterol issues and hypertension, feels very ill, and believes she is not receiving the care she needs.	She was scheduled to see medical on April 16, 2026 for a wellness check. Record reflects a provider consult on March 2, 2026, with treatment and medication provided and an offsite consult for rheumatoid arthritis, and another provider consult on March 19, 2026, also with treatment and medication provided. She is taking atorvastatin daily and losartan daily, and also carries a diagnosis of rheumatoid arthritis treated with a DMARD.	Blood pressure and lipids are documented as controlled; rheumatology consult is approved and pending. Case reflects active management of chronic conditions, though she continues to report feeling unwell.
11. I.K.	A703	Reportedly needs arthritis medication and stated she was not receiving it.	At intake and physical exam in November 2025, she denied chronic conditions, including arthritis, and denied taking medication. More recently, on April 13, 2026, she had a provider consult for arthritic pain with treatment, labs, and medication provided. On April 16, 2026, she had a provider consult for lab review, was diagnosed with rheumatoid arthritis, received treatment and medication, and had a rheumatology referral ordered.	Condition now appears recognized and under treatment, with rheumatology follow-up pending.
12. R.M.J.	A307	Reported to have an infection needing treatment.	Chart documents a skin boil on December 14, 2025, treated with medication, and a worsening boil on December 16, 2025, at which point she was sent to the ER and again treated. She was counseled regarding noncompliance with antibiotic therapy and	Based on the documented record, the infection issue appears historical rather than currently active, and no recent medical request is documented.

Resident / Family Member	ID / MRN	Reported Concern	Documented Recent Care	Current Status / Pending Need
			later completed antibiotics in December for the abscess. On March 16, 2026, she had a sick call for respiratory symptoms, with treatment provided.

Dilley Immigration Processing Center

2026 – HALAL Menu Review and Nutrition Statement

The six-week cycle, Halal menu for the Dilley Immigration Processing Center, for 2026 has been reviewed for nutritional adequacy. The menus provide a variety of foods and food groups and meet the Dietary Reference Intakes Recommended Dietary Allowances (RDA), and Adequate Intakes (AI) for adult populations for most leader nutrients and micronutrients for adults and youth up to 18 years of age.

The Halal menu is a modification of the regular menu for Dilley Immigration Processing Center offering Halal foods and using Halal practices related to food. This includes, but is not limited to, separate cooking equipment, utensils, food storage and an assigned cook for meal preparation.
